

3. Sleeping sickness is caused by

- (a) Giardia (b) Leishmania
(c) Trypanosoma (d) Entamoeba

B.P.S.C. Assistant Mains (GK) Paper II 2023

Ans. (c)

Sleeping sickness (Human African Trypanosomiasis) is caused by Protozoan Parasites transmitted by infected Tsetse flies. It is endemic in Sub-Saharan Africa. Human African Trypanosomiasis takes two forms, depending on the sub-species of the infecting parasite—

- (i) Trypanosoma brucei gambiense
(ii) Trypanosoma brucei rhodesiense

4. From the following pairs, find the one which is correctly matched.

- (a) Scurvy - Thiamine (b) Tuberculosis - ATS
(c) Tetanus - BCG (d) Malaria - Chloroquine
(e) None of the above/More than one of the above

67th B.P.S.C. (Re-Exam) (Pre) 2021

Ans. (d)

BCG vaccine is given to prevent tuberculosis. Erabrine, chloroquine etc. are used for the treatment of Malaria. Scurvy is a disease caused by the deficiency of vitamin C, whereas thiamine is known as vitamin B₁.

5. Which statement is not true regarding malaria?

- (a) It is a disease caused by insect parasite
(b) It is spread by the mosquitoes
(c) It spreads mostly in swampy region
(d) For its treatment chloroquine is used

38th B.P.S.C. (Pre) 1992

Ans. (a)

Malaria disease is caused by plasmodium parasite which is a protozoa. Thus option (a) is not true. Other three options are correct.

6. In the environment, plastics will not be decomposed by the action of

- (a) bacteria (b) saprophyte
(c) parasite (d) More than one of the above
(e) None of the above

B.P.S.C. PRT 2023 Shift I

Ans. (d)

Plastic is non-biodegradable and does not decomposed by the action of Bacteria, Saprophytes, Parasite.

7. Which of the following is a fungal poultry disease?

- (a) Moniliasis (b) Fowl pox
(c) Ranikhet (d) More than one of the above
(e) None of the above

BPSC (Tre-3) {Class 6-8}–2024

Ans. (a)

Moniliasis is a disease of the alimentary tract of chickens, turkey, and sometimes other birds. The cause is the fungal yeast, Candida albicans, and the condition is seen worldwide. Morbidity and mortality is usually low. The route of infection is normally oral.

V. Genetic Disorders

1. Thalassemia' is a hereditary disease affecting

- (a) blood (b) lungs
(c) heart (d) kidney
(e) None of the above / More than one of the above

B.P.S.C. Auditor 2021

Ans. (a)

Thalassemia is an inherited blood disorder caused when the body does not make enough of a protein called haemoglobin. When there is not enough haemoglobin, the body's red blood corpuscles (RBCs) do not function properly and they last shorter periods of time, so there are fewer healthy red blood corpuscles traveling in the bloodstream. So this condition can cause anemia.

2. In respect of women, men can suffer more of colour blindness because-

- (a) They pass more through mental tensions
(b) They live out of home relatively more
(c) They have only one X-chromosome
(d) Commonly they have less fat

41st B.P.S.C. (Pre) 1996

Ans. (c)

Colour blindness is inherited in an X-linked recessive pattern. The genes are located on the X-chromosome which is one of the two sex chromosomes. In males (who have only one X-chromosome) one genetic change in each cell is sufficient to cause the condition. Males are affected by X-linked recessive disorders much more frequently than females (who have two X-chromosomes) in which a genetic change would have to occur on both copies of the chromosome to cause the disorder. A characteristic of X-linked inheritance is that father cannot pass X-linked traits to their sons.

VI. Deficiency, Non-Contagious and Other Diseases

1. Which of the following pairs are correctly matched?

1. Anorexia : Sleep disorder
2. Insomnia : Eating disorder
3. Dyspnoea : Shortness of breath
4. Anosmia : Partial or full loss of smell

Select the correct answer using the codes given below.

- (a) Only 1 and 2 (b) Only 2 and 3
(c) Only 3 and 4 (d) All of the above

69th B.P.S.C. (Pre) 2023

Ans. (c)

Anorexia is associated with Eating Disorder. Insomnia is associated with Sleep Disorder. Dyspnoea is associated with Shortness of breath and Anosmia is associated with Partial or full loss of smell. Hence only option 3 and 4 are correct.
