

Major Mountain Ranges of the World

- (c) iv ii iii i
 (d) iv iii ii i

R.A.S./R.T.S. (Pre) 2021

Ans. (d)

The correct match is as follows :

Land form	Continent
Aconcagua	South America
Meseta	Europe
Serengeti Plains	Africa
Gibson Desert	Australia

16. Which of the following countries is not located on the Continent of Africa?

- (a) Gabon (b) Guinea
 (c) Guinea Bissau (d) Guyana

U.P. P.C.S. (Mains) 2017

Ans. (d)

Gabon is a country located on the West coast of Central Africa. It is located on the equator. Its capital and largest city is Libreville. **Guinea** is a west coastal country in West Africa. Conakry is its largest city and also its capital. It is the world's 2nd largest producer of bauxite and has rich deposits of diamonds and gold. **Guinea – Bissau** is a country in West Africa. Bissau is its capital city. **Guyana**, officially the Co-operative Republic of Guyana is a country in the northern mainland of South America. Guyana is the only South American nation in which English is the official language.

17. Which of the following is not associated with Australia Continent ?

- (a) Eyre Lake (b) Nullarbor Plain
 (c) Salwin Mountain (d) Salvin Valley

70th B.P.S.C Re-Exam 2024

Ans. (d)

The Eyre Lake Basin, located in Australia (and also the world's largest), is the largest internal drainage system, covering an area of approximately 1.2 million square kilometers. In the middle of the basin lies Lake Eyre.

The Nullarbor Plain is located on the southern coast of Australia. Mount Selwyn is located in Australia, while the Salween Valley is situated in the Arunachal Pradesh region of India.

The World Mountain

*A mountain range is a series of mountains arranged in a linear manner and connected by high ground. *Mountains have a steep slope and pointed summits. Though plateaus are also elevated structures. The main difference between a plateau and a mountain is that **the mountain is an elevated, pointed structure whereas a plateau is an elevated area with a flat top**. *Most geologists classify a mountain as a landform that rises at least 1000 metres or more above its

surrounding areas, landforms having elevation less than 1000 metres are generally classified as hills. Thus those areas having an elevation of 1000 m above sea level and also a high relative height in that area are considered to be mountainous regions. Mountains occupy approx. 25% of the Earth's land area however supports only 12% of the global population. ***British Columbia** is called a **Sea of Mountains**, a name given by Molyneux St. John, in his book "The Sea of Mountains: An account of Lord Dufferin's Tour Through British Columbia in 1876."

***Fold mountain** – are mountains that are formed mainly by the effect of folding of layers within the upper part of the Earth's crust. *The **Andes** is the most important mountain range in South America and also the largest mountain range in the world. It has a length of 7000 km. to 8900 km according to different standard sources. The highest peak of Andes is Aconcagua (6962 m).

***The Rocky Mountain** range is the most important mountain range of North America with an approximate length of 4800 km. The highest peak of the Rockies is Mount Elbert (4401 m). **The Himalayas** of South Asia are located at the northern most point of India. Their approximate length is 2500 km. The highest mountain peak in the world i.e., **Mount Everest** also known as Sagarmatha or Chomolungma (8848.86 m), along with the other highest peaks, is situated in the Himalaya Mountain Range.

*The **Southern Alps** are situated in the western part of the South Island of New Zealand. Its tallest peak is **Aoraki/Mount Cook**. *The **Alps** are the highest and most extensive mountain range system that is entirely in Europe. Its highest peak is **Mont Blanc** (4807 mt). The Alps are the most prominent example of young fold Mountains. ***The Atlas mountain Range** of Africa stretches around 2500 km through Morocco, Algeria and Tunisia.

***Block mountains** – Block mountains are formed as a result of **faulting** caused by tensile and compressive forces. They are also known as fault block mountains or horst mountains. Block mountains represent the upstanding part of the ground between two faults or on either side of a rift valley. *The **Sierra Nevada mountain** of California (USA) is the world's most extensive block mountains range. ***The Black Forest** of

Germany and Vosges of France are some more examples of block mountains. ***Salt Range** of Pakistan is also an example of block mountains.

***Dome Mountain** - The interior of the earth is hot enough to melt rocks. Melted rock sequences together into vast pools of magma beneath the ground. Since it's less dense than the surrounding rock, it makes its way upward to the surface. If the magma reaches the surface you get a volcano, but if the magma pushes up but doesn't actually crack through the surface, you get a dome mountain. ***The Cincinnati Arch of USA, Black Hills**, Bighorns are some examples of dome mountains. **Fujiyama** of Japan and **Cotopaxi** of Ecuador are also examples of domed mountains.

***Mixed Mountains** – When a lot of complexity is found in the formation of any mountain range then the mountain is called a mix mountain or a complex mountain. For example, Sierra Nevada and Anaconda Mountains Range of the USA.

(v) **Residual Mountains** – Residual Mountains are formed as a result of erosion of an existing elevated area. They are also called mountains of denudation. For example - **Pennines** (Europe), **Appalachian** (North America), **Aravallis** (India) etc.

***White Mountains** are situated in New Hampshire and Maine (USA). .

***Black Mountain** is situated in the State of North Carolina, USA. It is a part of the Great Appalachian Range.

***The Black Forest** is a large forested mountain range in southwest Germany. Its highest peak is Feldberg (1493 m). The Rhine is a European river that emerges in the Swiss Alps, then flows mainly through Germany, France and the Netherlands and eventually empties into the North Sea. The cities of **Cologne** and **Bonn** are situated on the banks of the river Rhine. The Black Forest mountains are located on the eastern side of this river and Vosges mountain is located on western side. *Burmese **Arakan Yoma** Mountain Range, located in the western Myanmar, creates a boundary between India and Myanmar. They include the Naga Hills, the Chin Hills, and the Patkai Range which includes the Lushai Hills. The highest peak of Arakan Yoma is **Natma Taung (Mount Victoria)**. The **Khasi Hills** are a part of the Garo-Khasi Jaintia range in the Indian state of Meghalaya. **Mount Titlis** is located in Switzerland. The mountain is made of volcanic lava. The Apennines are located in Italy. *It extends the entire length of Peninsular Italy. *The length of this range is appx. 1350 km. *The tallest peak of this range is **Corno Grande** (2,914 m). *The **Dinaric Alps** are a mountain

range in Europe. They stretch from Italy through Slovenia, Croatia, Bosnia and Herzegovina, Serbia, Montenegro and Kosovo to Albania.

*The Jura Mountains extend in the countries, France and Switzerland. *The **Pyrenees** is a range of mountains in southwest Europe that forms a natural border between Spain and France. It also separates the Iberian Peninsula from the rest of continental Europe and extends for about 491 km from the Bay of Biscay to the Mediterranean Sea. ***The Great Dividing Range** or the Eastern Highlands is Australia's most substantial mountain range and the third longest land-based range in the world. Its highest point is **Mount Kosciuszko** located in New South Wales Australia. The elevation of Mount Kosciuszko is 2,228 m. *Denali is also known as **Mount McKinley** is the highest mountain peak in North America with a summit elevation of 6,190 m above sea level. On August 2015, it was decided to change the name of Denali.

***Mount Elbrus** is an extinct volcano in the Caucasus Mountains and is considered the highest (5642 m) mountain in Europe and Russia. ***Mount Kilimanjaro** is a dormant volcano in Tanzania. It is the highest mountain in Africa (5895 m above sea level). *The **Allegheny Mountain Range** is a part of the Appalachian Mountain Range of North America. *The **Cantabrian Mountain Range** is a system of a mountain range in Spain. **Mount Mackenzie** is located in Canada. ***The Golan Heights** is located in the Middle East. It is a basaltic plateau located in the southwest of Syria. Since the 1967 six-day-war, the western 2/3rd of the Golan heights has been occupied and administered by Israel and by 1981 it was totally annexed by Israel.

***Alps, Andes and Himalayas** belong to the Tertiary Period. Apart from them Rockies and Atlas Mountain Ranges also belong to Tertiary Period. *The **Appalachians** belong to **Caledonian Era**. ***The Aravalli range** of India belongs to the **Pre-Cambrian Era**. *Black Forest, Vosges, Tien Shan, Nan Shan, Gobi, etc. are examples of **Hercynian Orogeny**.

1. Consider the following mountains and arrange them in correct order from West to East by their location:

- | | |
|---------------|-----------|
| 1. Karakoram | 2. Pontic |
| 3. Hindu Kush | 4. Zagros |

Select the correct answer from the codes given below:

- | | |
|----------------|-------------|
| (a) 2,4,3,1 | (b) 2,3,4,1 |
| (c) 4, 2, 3, 1 | (d) 4,1,2,3 |

UPPSC (Pre) 2024

Ans. (a)

Correct order from west to east-

Pontic → Zagros → Hindukush → Karakoram

The Pontic Mountains are primarily located in Türkiye on the Anatolian plateau, south of the Black Sea. The Zagros Mountains are mainly situated in Iran.

From the Pamir knot in Asia, the Hindukush mountain range extends westward, while the Karakoram mountain range extends eastward.

2. **Darling range is situated along which of the following coasts of Australia?**

- North-Eastern Coast
- Southern Coast
- Eastern Coast
- South-Western Coast

U.P. P.C.S. (Pre) 2020

Ans. (d)

The Darling range is situated on the South Western coast of Australia. This range is located in Western Australia.

3. **Which one of the following is known as the 'Sea of mountains'?**

- Japan
- British Columbia
- West Coast of South America
- South-East Asia

U.P.P.C.S. (Mains) 2015

Ans. (b)

British Columbia is called a 'Sea of Mountains', a name given by Molyneux St. John, through his book 'The Sea of mountains : An Account of Lord Dufferin's Tour Through British Columbia in 1876.

4. **Highest peaks of the world are mostly found in which type of Mountains?**

- Old folded mountains
- Young folded mountains
- Residual mountains
- Block mountains

45th B.P.S.C. (Pre) 2001

Ans. (b)

World's many highest peaks including the highest peak Mount Everest are situated in the Himalayas. The Himalaya are a young folded mountain range. Thus, it is clear that the world's highest peaks are situated in young folded mountains.

5. The largest mountain series of the World is –

- (a) Himalaya (b) Andes
(c) Rockies (d) Alps

41st B.P.S.C. (Pre) 1996

Ans. (b)

The Andes is the longest mountain range in the world, located along the entire western coast of South America. The Andes mountain range is 7000 km to 8900 km long. The Rocky Mountain are the major mountain system of North America extending over 4800 km. The Himalayas are a prominent mountain range in South Asia situated at the northern end of India with a length of approximately 2500 km.

6. Which is the oldest mountain of South America continent?

- (a) Pacaraima (b) Turmuc-Humuk
(c) Andes Mountain (d) Brazil Mountain

70th B.P.S.C Re-Exam 2024

Ans. (a)

The Pacaraima Mountains are composed of tepui plateaus, some of the oldest geological formations on Earth, dating back approximately 1.8 billion years to the Precambrian era. These tabular uplands of the Guiana Highlands are primarily crystalline block mountains shaped by millennia of erosion and geological activity.

7. Among the following, which one is not a young folded mountain?

- (a) Sierra Nevada (b) Rocky
(c) Himalaya (d) Alps

M.P. P.C.S. (Pre) 2021

Ans. (a)

Mountain ranges like Rocky, Himalaya, Alps etc. are examples of newly folded mountains, while Sierra Nevada is an example of a block mountain, this mountain is located in the California province of USA. Hence option (a) is correct.

8. In which of the following continents, the Andes Mountain Range is located?

- (a) Australia (b) Europe
(c) South America (d) North America

M.P.P.C.S. (Pre) 2012

Ans. (c)

See the explanation of the above question.

9. In which of the following Continents the Andes Mountain Range is located ?

- (a) Australia (b) Europe

- (c) South America (d) Asia

Uttarakhand P.C.S. (Pre) 2006

Ans. (c)

See the explanation of the above question.

10. Which one of the following is the longest mountain range?

- (a) The Rocky (b) The Alps
(c) The Himalayas (d) The Andes

U.P.P.C.S. (Mains) 2016

Ans. (d)

The Andes is the longest mountain range in the world. It stretches 7000 km to 8900 km. The Rocky Mountains are a major folded mountain range of North America. Its length is 4800 km. The Himalayan mountain range is situated in South Asia on the northern end of India. Their length is 2500 km. The Alps is the longest mountain range in Europe. It is 1200 km long.

11. Longest surface mountain range in the world is:

- (a) Alps mountain range
(b) Rockies mountain range
(c) Himalaya mountain range
(d) Andes mountain range

Uttarakhand P.C.S. (Pre) 2021

Ans. (d)

Alps mountain range is heigher and most extensive range of Europe. Andes mountains extend over seven countries Argentina, Bolivia, Chile, Colombia, Ecuador, Peru and Venezuela, known as Andean State. It is the longest mountain range in the world.

12. The Andes extends along which of the following ?

- (a) West Coast of India
(b) West Coast of North America
(c) East Coast of Australia
(d) West Coast of South America

70th B.P.S.C. Pre-2024

Ans. (d)

The Andes Mountains are the longest continental mountain range in the world, running along the entire western coast of South America. They pass through seven countries: Venezuela, Colombia, Ecuador, Peru, Bolivia, Chile and Argentina.

13. Southern Alps mountain ranges are situated in –

- (a) Australia (b) South Africa
(c) Antarctica (d) New Zealand

R.A.S. / R.T.S. (Pre) 1992

Ans. (d)

Southern Alps Mountain Range is situated in the South Island, New Zealand along its western coast. It rises to 3724 meters at Aoraki/Mount Cook, the highest peak of New Zealand.

14. Place the following mountain ranges of the world in the descending order of their lengths and find the correct option from the given code –

- (i) Andes (ii) Great Dividing Range
(iii) The Himalaya (iv) The Rocky

Code :

- (a) (i) (iii) (iv) (ii)
(b) (i) (iv) (iii) (ii)
(c) (iv) (i) (ii) (iii)
(d) (iv) (iii) (i) (ii)

U.P.P.C.S. (Spl) (Pre) 2008

Ans. (b)

In the above question the nearest suitable option is (b). Although the correct order is –

Mountain	Location	Highest Peak	Height (m)	length (km)
Andes	W.S America	Aconcagua	6962	7000-8900
Rocky	W. N America	Mount Albert	6962	4800
Great Dividing Range	E. Australia	Mt Kosciuszko	2228	3700
Himalaya	India	Mount Everest	8848.86	2500

i.e., Andes > Rocky > Great Dividing Range > Himalaya.
(7000-8900) (4800) (3700) (2500)

It may be that commission has included north-eastern mountain ranges (1400) as part of the Himalaya system making it 3900 km long to justify the option but it is wrong.

15. The Alps mountain range is not a part of which of the following countries ?

- (a) France (b) Germany
(c) Austria (d) England

Uttarakhand P.C.S. (Pre) 2006

Ans. (d)

The Alps are a mountain range located in Europe immediately north of the Mediterranean Sea. This range extends in mainly through France, Austria, Germany and Switzerland. The highest peak of the Alps Mont Blanc (4,807 meters high). The alps mountains is an example of young folded mountain in the world. The Alps are not a part of England.

16. A mountain range of Europe is –

- (a) Alps (b) Himalaya
(c) Andes (d) Rocky

48th to 52nd B.P.S.C. (Pre) 2008

Ans. (a)

See the explanation of the above question.

17. Match List-I and List-II and select the correct answer using the code given below:

List-I (Mountain)	List-II (Continent)
A. Andes	1. Europe
B. Altai	2. North America
C. Alps	3. Asia
D. Appalachian	4. South America

Code -

- (a) A-1, B-3, C-4, D-2 (b) A-3, B-4, C-1, D-2
(c) A-4, B-3, C-2, D-1 (d) A-4, B-3, C-1, D-2

U.P. R.O./A.R.O. (Pre) 2023

Ans. (d)

The correct matching is as follows :

Mountain	Continent
Andes	South America
Altai	Asia
Alps	Europe
Appalachian	North America

18. White Mountains are founded in –

- (a) Canada (b) Norway
(c) Russia (d) United States of America

U.P.U.D.A./L.D.A. (Pre) 2001

Ans. (d)

The White Mountains are situated in the New Hampshire and Maine states of the United States of America.

19. Three mountain ranges determining the boundary between India and Myanmar are –

- (a) Khasi, Patkoi and Arakan Yoma
(b) Akai Mountain Range
(c) Great Dividing Range
(d) None of the above

U.P. Lower Sub. (Pre) 1998

Ans. (d)

The Burmese Arakan Yoma mountain range is in Western Myanmar. It is a prominent mountain range that defines the boundary between India and Myanmar. Its main hills are Naga, Chin, Lushai and Patkoi. Its highest peak is Natma Taung/Mt. Victoria). The Khasi Hills are situated in Meghalaya and they do not define the boundary of India and Myanmar. Therefore option (d) is correct.

20. Arakan Yoma is the extension of the Himalayas located in :

- (a) Myanmar (b) Baluchistan
(c) Nepal (d) Kashmir

R.A.S./R.T.S. (Pre) 2000

R.A.S./R.T.S. (Pre) 1999

I.A.S. (Pre) 1995

Ans. (a)

See the explanation of the above question.

21. Black Forest mountain is situated in –

- (a) France (b) Germany
(c) Ukraine (d) Russia

U.P. Lower Sub (Pre) 2004

Ans. (b)

Block mountains are formed when faults or cracks in the Earth's crust force some material up and others down. Black Forest is located in Germany. Vosges mountain (in France) is another example of such type of mountains.

22. Which of the following mountains is located in Germany ?

- (a) Black Forest (b) Atlas
(c) Pyrenees (d) Apennines

U.P.P.C.S. (Mains) 2012

Ans. (a)

Black Forest mountain is located in Germany. The highest peak of this mountain range is Feldberg (1493 m).

23. Which of the following mountains is located along the Rhine river?

- (a) Pyrenees (b) Apennines
(c) Carpathian (d) Black Forest

U.P.P.S.C. (R.I.) 2014

Ans. (d)

Rhine river emerges from the Alps mountains in Switzerland and falls into the North Sea passing through France, Germany and the Netherlands. The cities of Bonn and Cologne are located on the banks of River Rhine. On the eastern side of the Rhine, there is the Black Forest and on the western side of the river, the Vosges Mountains are stretched.

24. Black Mountain is situated in –

- (a) Canada (b) Norway
(c) Switzerland (d) U.S.A

U.P. Lower Sub. (Pre) 2009

Ans. (d)

The Black Mountains are located in the State of North Carolina in the United States of America. These Mountains are part of the Appalachian Mountains.

25. The Mountain range which is different from the others is–

- (a) The Alps (b) The Andes
(c) Appalachian (d) The Himalayas

R.A.S./R.T.S. (Pre) 1999

Ans. (c)

The Alps, the Andes and the Himalayas are mountains of the Tertiary or Alpine period folded mountains. The Rocky and the Atlas are also of the same category. The Appalachian is an old mountain range belonging to the Caledonian period. Therefore, this is different from the others.

26. Which of the following range of mountains is not the result of Tertiary orogeny?

- (a) Kunlun (b) Appalachians
(c) Alps (d) Andes

U.P.P.C.S. (Mains) 2014

Ans. (b)

See the explanation of the above question.

27. Which one of the following is not an old folded mountain?

- (a) Ural mountain (b) Aravalli mountain
(c) Andes mountain (d) Appalachian mountain

Uttarakhand P.C.S. (Pre) 2016

Ans. (c)

Among the given options Ural mountain, Aravalli mountain and Appalachian mountain are old folded mountains but the Andes is a young folded mountain. Other young folded mountains are Rocky, Alps, Himalaya etc.

28. Consider the following information:

	Region	Name of the mountain range	Type of Mountain
1.	Central Asia	Vosges	Fold mountain
2.	Europe	Alps	Block mountain
3.	North America	Appalachians	Fold mountain
4.	South America	Andes	Fold mountain

In how many of the above rows is the given information correctly matched?

- (a) Only one (b) Only two
(c) Only three (d) All four

I.A.S. (Pre) 2024

Ans. (b)

There are three types of mountains - Fold Mountains, Block Mountains and Volcanic Mountains. The Himalayan mountains (Asia), the Andes (South America) and the Alps (Europe) are young fold mountains with rugged relief and high conical peaks. The Aravali range in India is one of the oldest fold mountain systems in the world. The range has considerably worn down due to the processes of erosion. The Appalachians in North America and the Ural mountains in Russia have rounded features and low elevation. They are very old fold mountains.

Block mountains are created when large areas are broken and displaced vertically. The uplifted blocks are termed as horsts and the lowered blocks are called graben. The Rhine valley and the Vosges mountains in Europe are examples of such mountain systems.

Volcanic mountains are formed due to volcanic activity. Mt. Kilimanjaro in Africa and Mt. Fujiyama in Japan are examples of such mountains.

Hence, rows 1 and 2 are not correctly matched while rows 3 and 4 are correctly matched.

29. The Pennines (Europe), the Appalachians (America) and the Aravallis (India) are examples of

- (a) Young mountains (b) Old mountains
(c) Block mountains (d) Fold mountains

56th to 59th B.P.S.C. (Pre) 2015

Ans. (b)

The Pennines (Europe), the Appalachians (North America) and the Aravallis (India) are examples of an old mountains. Old fold mountains are characterized by having stopped growing higher due to the cessation of upward thrust caused by the stopping of movement of tectonic plates in the Earth's crust.

30. Drakensberg is a mountain of –

- (a) Botswana (b) Namibia
(c) South Africa (d) Zambia

U.P. Lower Sub. (Pre) 2008

U.P.P.C.S. (Pre) 2007

Ans. (c)

The Drakensberg is a mountain range extending through mainly South Africa and Lesotho. Its highest peak is Thabana Ntlenyana (3482 m) located in Lesotho whereas another peak Mafadi (3450 m), the second highest peak of this range is located in Lesotho and South Africa.

31. In which Continent is the Atlas Mountain situated?

- (a) Asia (b) Africa

(c) Australia

(d) Europe

R.A.S./R.T.S.(Pre) 2008

Ans. (b)

The Atlas Mountain is extends across Morocco, Algeria and Tunisia in the African continent.

32. The Atlas Mountains are located in which continent?

- (a) Africa (b) North America
(c) South America (d) Australia

M.P.P.C.S. (Pre) 2022

Ans. (a)

The Atlas Mountains are located in The African continent. According to the European Space Agency the mountains an extension of Europe's Alpine system stretch about 2400 km through Morocco, Algeria and Tunisia. Significantly, the mountains are a series of five ranges that separate the northern Mediterranean climate from the arid climate of the Sahara Desert in the south. Morocco is home to three of the ranges: the High Atlas, Middle Atlas and Anti Atlas. Besides this the Tell Atlas and the Saharan Atlas are located in Algeria.

33. Match List-I with List-II and select the correct answer from the codes given below :

List-I (Mountain)	List-II (Country)
A. Allegheny	1. Canada
B. Cantabrian	2. Iran
C. Elburz	3. Spain
D. Mackenzie	4. U.S.A.

Code :

	A	B	C	D
(a)	4	3	2	1
(b)	4	1	3	2
(c)	2	3	4	1
(d)	1	4	2	3

U.P.P.C.S. (Mains) 2010

Ans. (a)

The correct match of mountains and their countries is as follows :

Allegheny	-	U.S.A
Cantabrian	-	Spain
Elburz	-	Iran
Mackenzie	-	Canada

34. Match List-I with List-II and select the correct answer using codes given below :

List-I (Mountain Peak)	List-II (Continent)
A. Kosciuszko	i. Europe
B. Mckinley	ii. Africa
C. Elbrus	iii. Australia
D. Kilimanjaro	iv. North America

Code :

	A	B	C	D
(a)	iii	iv	i	ii
(b)	ii	iv	iii	i
(c)	iv	iii	ii	i
(d)	iii	i	ii	iv

R.A.S./R.T.S. (Pre) 2016

Ans. (a)

The correctly matched mountain peaks with their continents are as follows :

Kosciuszko (2228 mt.)	-	Australia
Mckinley (6190 mt.)	-	North America
Elbrus (5642 mt.)	-	Europe
Kilimanjaro (5895 mt.)	-	Africa

35. Which one of the following pair is not correctly matched?

Mountain Peak	-	Continent
(a) Kilimanjaro	-	Africa
(b) Mount Mckinley	-	North America
(c) Elbrus	-	Asia
(d) Aconcagua	-	South America

M.P.P.C.S. (Pre) 2021

Ans. (c)

See the explanation of the above question.

36. Match list-I with list-II and select the correct answer using the code given below :

List-I (Mountain)	List-II (Countries)
(A) Kilimanjaro	(1) Morocco
(B) Toubkal	(2) Algeria
(C) Stanley	(3) Tanzania
(D) Hoggar	(4) Uganda

Code :

- (a) A-(3), B-(1), C-(4), D-(2)
(b) A-(4), B-(2), C-(3), D-(1)

- (c) A-(3), B-(4), C-(1), D-(2)
(d) A-(4), B-(3), C-(2), D-(1)

U.P.P.C.S. (Pre) 2023

Ans. (a)

List-I (Mountains)	List-II (Countries)
Kilimanjaro	Tanzania
Toubkal	Morocco
Stanley	Uganda
Hoggar	Algeria

37. Make the correct match between the list-I and list-II and using the following codes, select the correct option

List-I	List-II
A. Alps	1. Block Mountain
B. Vosges	2. Volcano Mountain
C. Vindhya	3. Folded Mountain
D. Fujiyama	4. Residual Mountain

Code :

	A	B	C	D
(a)	2	4	1	3
(b)	3	1	4	2
(c)	1	3	2	4
(d)	1	4	3	2

U.P.U.D.A./L.D.A. (Pre) 2013

Ans. (b)

Below is the correct match of list-I with list-II.

Alps	-	Folded Mountain
Vosges	-	Block Mountain
Vindhya	-	Residual Mountain
Fujiyama	-	Volcano Mountain

38. Mount Titlis is in –

- (a) Germany (b) France
(c) Switzerland (d) U.S.A.

U.P.P.C.S. (Mains) 2004

Ans. (c)

Mount Titlis is located in Switzerland. This mountain is formed by the cooling of the lava from a volcano. The Black Forest Mountain Range belongs to Germany and the Rocky Mountain Range is located in North America.

39. Which of the following mountains is located in Italy?

- (a) Appennine (b) Pyrenees
(c) Dinaric Alps (d) Jura

U.P.R.O./A.R.O. (Mains) 2014

Ans. (a)

The Apennine Mountain Range is in Italy. Its total length is approximately 1350 km. Corno Grande (2914 m) is the highest peak of Apennine Mountain Range, whereas the Pyrenees define the boundary of France and Spain. 45. Which of the following is a basic landform?

- (a) Volcanic cone (b) Residual mountain
(c) Monadnock (d) Erosional waterfall

Uttarakhand P.C.S. (Pre) 2016

Ans. (a)

The volcanic cone is a basic landform. It is formed by fragments (called ejecta) thrown up (ejected) from a volcanic vent, lava and ash piling up around the vent in the shape of a cone with a central crater. A residual mountain is originally a mountain but due to erosion it becomes a residual mountain. In the same way, the erosional waterfall and Monadnock are also formed after erosional work.

46. Match List I with List II and select the correct answer using codes given below :

List-I (Mountain Peak)	List-II (Location/Country)
A. Elbrus	1. New Zealand
B. Kilimanjaro	2. U.S.A.
C. Mt. Cook	3. Tanzania
D. McKinley	4. Russia
