

IV. Line joining the easternmost and westernmost points of India lies to the north of the Tropic of Cancer.

Select the correct answer from the options given below:

- (a) I and II (b) III and IV
(c) II and III (d) I and IV

Jharkhand P.C.S. (Pre) 2023

Ans. (d)

The Tropic of Cancer is an imaginary line (23°30' North latitude passes through the middle of the country). This imaginary line divides India into two halves. Significantly, the Tropic of Cancer does not divide the Indian International boundary into two halves. Notably, the maximum east-west expansion of India does not lie along the Tropic of Cancer. Significantly the line joining the easternmost and westernmost points of India lies to the north of the Tropic of Cancer. Easternmost point of India is Kibithu in Arunachal Pradesh while the Westernmost point is Guhar Moti in the Kutch district of Gujarat.

12. Which of the following Indian states lies north of the Tropic of Cancer ?

- (a) Jharkhand (b) Manipur
(c) Mizoram (d) Tripura

R.A.S./R.T.S. (Pre) (Re. Exam) 2013

U.P.P.C.S. (Mains) 2008

Ans. (b)

The Tropic of Cancer passes through 8 Indian states namely Mizoram, Tripura, West Bengal, Jharkhand, Chhattisgarh, Madhya Pradesh, Rajasthan and Gujarat. Manipur lies north of the Tropic of Cancer.

13. Which, among the following places, will have maximum day length in the month of June ?

- (a) Hyderabad (b) Chennai
(c) Bhopal (d) Delhi

Uttarakhand P.C.S. (Mains) 2006

Ans. (d)

The length of days in northern hemisphere, starts increasing after the sun moves north of equator. On 21 June (summer solstice), the sun is directly overhead, and the north pole is tilted towards the sun; and therefore, the northern hemisphere has days ranging from just over 12 hours around to 24 hours in Arctic Circle. Delhi is the most appropriate answer as it is the most northerly given option.

14. Which of the following city is nearest to the Tropic of Cancer?

- (a) Jabalpur (b) Ahmedabad
(c) Ujjain (d) Varanasi

U.P.P.C.S. (Mains) 2017

Ans. (a)

The latitudinal position of the cities given in the option is as follows :

(Place)	(Latitude)
Jabalpur	23°11' North
Ahmedabad	23°02' North
Ujjain	23°09' North
Varanasi	25°18' North

According to the latitudinal position of the above mentioned cities, the nearest city to the Tropic of Cancer would be Jabalpur, because of the latitudinal difference between the latitude of Jabalpur and the Tropic of Cancer are the least.

15. Which of the following rivers of India crosses the Tropic of Cancer twice?

- (a) Mahi
(b) Chambal
(c) Narmada
(d) None of the above

U.P.R.O./A.R.O. (Re-exam) (Pre.) 2016

Ans. (a)

Mahi River crosses the Tropic of Cancer twice. It originates in Madhya Pradesh and flows through Rajasthan, Gujarat, and drains into the Gulf of Khambhat in the Arabian Sea.

iv. Standard Time

*To avoid difficulties a system of standard time is observed by all countries. Most countries adopt their standard time from the central meridian of the countries. *There is a general understanding among the countries of the world to select the standard meridian in multiples of 7°30' of longitude. That is why 82°30'E has been selected as the Standard Meridian of India. This meridian passes through the Mirzapur district (near Allahabad now Prayagraj) in the state of UP. *Indian Standard Time (I.S.T.) is 5 hours and 30 minutes ahead of Greenwich Mean Time (G.M.T.).
