

vi. Chambal Valley Project

*Chambal river originates from Janapav hills near Mhow (Now- Dr. Ambedkar Nagar) in Madhya Pradesh. It meets the river Yamuna near **Itawa**. Chambal project is a joint venture of **Rajasthan** and **Madhya Pradesh**. Under this project, three dams have been constructed-

1. Gandhi Sagar Dam (M.P.)
2. Rana Pratap Sagar Dam (Rajasthan)
3. Jawahar Sagar Dam (Rajasthan)

***Gandhi Sagar Dam** project is the first among the four Chambal valley projects. This dam is established in **Mandsaur district (M.P.)**. The height of this dam is 62.17 meter. The work was started in 1957 in the Power Station, while Power generation and its distribution commenced in November 1960. ***Rana Pratap Sagar Dam** has been established in Rajasthan. ***Jawahar Sagar Dam** was constructed 30 km far from Kota in Rajasthan.

1. Given below are two statements, one is labelled as **Assertion (A)** and the other as **Reason (R)**.
Assertion (A) : Jet streams discovered during World-War II are high altitude easterly winds.
Reason (R) : Jet streams flow with a speed of 300 — 500 km/hour.
Select The correct answer from the codes given below:
(a) Both (A) and (R) are true and (R) is the correct explanation of (A).
(b) (A) is false, but (R) is true.
(c) Both (A) and (R) are true, but (R) is not the correct explanation of (A).
(d) (A) is true, but (R) is false.

UPPSC (Pre) 2024

Ans. (b)

In the upper part of the troposphere or at the tropopause, generally at an altitude to 5 to 9 miles (approximately 8 km to 15 km.), a powerful circumferential wind current flowing from west to east in a broad belt spanning hundreds of kilometres is known as the jet stream. The discovery (confirmed) of the jet stream occurred during world war II, although atmospheric scientists had proposed the existence of jet streams before that. The wind speed in jet streams varies seasonally, becoming stronger in winter compared to summer. The wind speed in these streams typically range from 129 to 225 km/h, but it can exceed 443 km/h. Therefore, the flow speed of jet streams can be considered to range between 300 and 500 km/h. Hence, (A) is incorrect, but (R) is correct.

2. Which dam has been constructed on the Chambal river?

- (a) Indira Sagar (b) Sardar Sarovar
(c) Gandhi Sagar (d) Bhakra Dam

M.P.P.C.S. (Pre) 2006

Ans. (c)

Chambal river originates near Janapav Hills in Mhow (Now- Dr. Ambedkar Nagar) in Madhya Pradesh. It merges with Yamuna river near Itawa, U.P. Chambal Project built on Chambal river is a joint project of Rajasthan and Madhya Pradesh. This project includes the Gandhi Sagar Dam (M.P.), Rana Pratap Sagar dam and Jawahar Sagar Dam (Rajasthan).

3. The benefits of which one of the following river valley projects are shared by more than one state ?

- (a) Chambal Valley Project (b) Mayurakshi Project
(c) Sharavati Project (d) Hirakud Project

U.P. Lower Sub. (Spl) (Pre) 2009

U.P.P.C.S. (Pre) 2007

Ans. (*)

Chambal valley Project benefits Rajasthan and Madhya Pradesh, Mayurakshi project is shared by West Bengal and Jharkhand whereas Hirakud and Sharavati projects benefit Odisha and Karnataka respectively. Thus both (a) and (b) are correct.

4. Gandhi Sagar Dam is a part of which one of the following?

- (a) Chambal Project (b) Kosi Project
(c) Damodar Valley Project (d) Bhakra Nangal Project

I.A.S. (Pre) 2005

Ans. (a)

Gandhi Sagar Dam is the first of the four Chambal Valley Projects, located in the Madhya Pradesh. The dam is located in the Mandsaur district of Madhya Pradesh. It is a masonry gravity dam of 62.17 mt height. The work was started in 1957 in the power station, while power generation and its distribution commenced in Nov. 1960.

5. Which of the following are not associated with the Chambal Valley Project ?

1. Gandhi Sagar
2. Jawahar Sagar
3. Gobind Sagar
4. Govind Ballabh Pant Sagar

Select the correct answer from the code given below :

Code :

- (a) 1 and 2 (b) 2 and 3
(c) 3 and 4 (d) 1 and 4

U.P.P.C.S. (Mains) 2011

Ans. (c)
