

3. An extension worker does not need political competency.
4. The most critical stage of irrigation in wheat is flowering stage.

Which of these statements are correct ?

- (a) Only 1 and 2 (b) Only 2 and 3
(c) Only I, 2 and 4 (d) Only I, 2 and 3

U.P. Lower Sub. (Pre) 2013

Ans. (d)

According to Economic Survey 2024-25 in the year 2023-24 data, the largest producer of wheat is Uttar Pradesh. Rice and wheat occupy the largest area in cropping pattern in U.P. Irrigations are given at critical stages of growth. These stages include C.R.I. stage (Crown root initiation) where irrigation is done after 20 to 25 days of sowing to promote tillering. CRI stage is the most critical stage for irrigation in wheat because any shortage of moisture at this stage results in less tillering, formation of small earheads and a significant reduction in yield.

32. 'Triticale' is a cross between which of the following?

- (a) Barley and Rye (b) Wheat and Oat
(c) Wheat and Barley (d) Wheat and Rye

U.P.P.C.S. (Mains) 2014

Ans. (d)

"Triticale" is a cross (hybrid) between Wheat and Rai.

33. The statements are given below, labeled as Assertion (A) and Reason (R). In the context of these two statements, select the correct answer from the codes given below.

Assertion (A) : Punjab, Haryana, Uttar Pradesh are major wheat producing states of India.

Reason (R) : The well drained fertile soil, $10^{\circ} - 15^{\circ}\text{C}$ temperature during winter and about 75 cm annual average rainfall are necessary for wheat production.

Codes :

- (a) Both (A) and (R) are true, and (R) is the correct explanation of (A)
(b) Both (A) and (R) are true, but (R) is not the correct explanation of (A)
(c) (A) is true, but (R) is false
(d) Both (A) and (R) are false

M.P.P.C.S. (Pre) 2020

Ans. (b)

Punjab, Haryana, Uttar Pradesh are major wheat producing states of India. So the assertion is true. The well drained fertile soil, $10^{\circ}-15^{\circ}\text{C}$ temperature during winter and about 75cm annual average rainfall are necessary for wheat production. From this point of view the reason is also true. However reason (R) is not the correct explanation of assertion (A).

34. 'Karnal bunt' is a disease of –

- (a) Paddy (b) Pea
(c) Mustard (d) Wheat

U.P. Lower Sub. (Pre) 2015

Ans. (d)

Karnal Bunt is a fungal disease of wheat. It is caused by *Tilletia Indica*. This disease was first identified in 1931.

35. The botanical name of macaroni wheat is :

- (a) *Triticum aestivum* (b) *Triticum monococcum*
(c) *Triticum durum* (d) *Triticum dicoccum*

Jharkhand .P.C.S. (Pre) 2021

Ans. (c)

The botanical name of macaroni wheat is *Triticum durum*.

36. Which one of the following substances is a herbicide?

- (a) Chlorpyrifos (b) Carbendazim
(c) Quinolphos (d) Butachlor

U.P. R.O./A.R.O. (Pre) 2017

Ans. (d)

Butachlor is a herbicide. Chlorpyrifos and Quinolphos are a pesticide. Carbendazim is a fungicide.

ii. Kharif Crops

*Kharif Crops are sown with the initiation of Monsoon in different regions and harvested in October-November. Major Kharif crops are - **Paddy, Millet, Soybean, Peanut**, etc. **Soybean** is also a Kharif crop. Paddy is grown mainly in Assam, West Bengal, Odisha, Andhra Pradesh, Tamil Nadu, Kerala, Konkan coast area of Maharashtra, U.P. and Bihar. Development of irrigation system led to its cultivation in Punjab and Haryana also.

*Paddy is a tropical crop. For the cultivation of Rice, the required normal temperature is above **25°C** and average annual rainfall more than **100 cm**. Rice is one of the important food crops in India. According to data Economic Survey 2024-25, in the year 2023-24, 47.8 million hectares (2023-

24) area of India is covered under rice cultivation.

*According to data Agriculture Statistics at a Glance, 2023 in the year 2022-23 the largest area under rice cultivation is in **Uttar Pradesh** (5.90 million hectares). West Bengal (5.07 million hectares) stands in second place and Telangana (4.66 million hectares) in the third place.

*Highest rice productivity in India is in **Punjab**. Productivity in Punjab was 4193 kg per hectare in 2022-23. The average rice productivity per hectare in India is 2882 kg per hectare in 2023-24.

*The deltaic region of Krishna and Godavari is known as 'Rice Bowl of India'. The region falls under the state of Andhra Pradesh.

Major rice producing region are Telangana and Rayal seema which is extended on the Krishan-Godavari delta.

*According to data Economic Survey 2024-25, the leading rice-producing states in 2023-24 are –

(1) Telangana (16.87 Million Tonnes)

(2) U.P. (15.99 Million Tonnes)

(3) West Bengal (15.69 Million Tonnes)

*Main varieties of Paddy in India are **Jamuna, Cauvery, Jaya, Kanchi, Jagannath, Krishna, Hansa, Vijaya, Padma, Annapurna, Bala** and **Ratna**. **Aman rice** is sown in **June-July** and harvested in November-December.

***Pusa-Sugandh** is an aromatic variety of rice. **Pusa RH-10** is a hybrid Basmati rice. Other hybrid varieties are **PHB-71, Ganga, Suruchi, KRH-2, Sahyadri-4**. *The proper seed rate for transplanting of Basmati rice is **15-20 kg** per hectare.

*Barani Deep, Narendra Shankar, Narendra Shuska Samrat, Lalmati etc. are varieties of Rice.

*Blue Green Algae, Azospirillum, Phosphobacteria and Azolla are important Bio-fertilizers.

1. Rice originated in –

- (a) Europe
- (b) South-East Asia
- (c) South America
- (d) None of the above

U.P.P.C.S. (Mains) 2015

Ans. (b)

Rice originated in South-East Asia. Rice requires temperature above 25°C and an average rainfall above 100 cm.

2. Which one of the following pairs (Crop — Peculiarity) is not correctly matched?

- (a) State where rice is grown three times in a year - West Bengal
- (b) Bihar contribution to rice production - 15.7%

- (c) State with largest area under rice production - Uttar Pradesh
- (d) Isohyets that decide western limit of rice production - 100 cm

UPPSC (Pre) 2024

Ans. (b)

Rice is primarily a Kharif Crop. However, in India, the time of rice cultivation varies based on altitude, climate (temperature, rainfall), Soil type and water availability. In the eastern (Including West Bengal) and Southern States of the Country, the average temperature throughout the year remains favorable for rice cultivation, allowing for two or even three crops annually. Therefore, in the eastern states, mainly West Bengal, Assam, Odisha and eastern region of Uttar Pradesh and Bihar the rice crops are grown. In contrast only one crop of rice is cultivated in the northern and western part of the country. The isohyet of 100 cm of rainfall determines the western limit of rice production. According to Agricultural Statistics at a Glance, 2023 for the year 2022-23, Uttar Pradesh has the largest area under rice production (12.33%). As per the same report, Bihar contribution of rice production is 5.99%. Therefore, the statement given in option (a), (c) and (d) are correct, while the statement given in option (b) is incorrect. Hence, option (b) is the correct answer.

3. "System of Rice Intensification" of cultivation in which alternate wetting and drying of rice fields is practiced, results in :

- 1. Reduced seed requirement
- 2. Reduced methane production
- 3. Reduced electricity consumption

Select the correct answer using the code given below :

- (a) 1 and 2 only
- (b) 2 and 3 only
- (c) 1 and 3 only
- (d) 1, 2 and 3

I.A.S. (Pre) 2022

Ans. (d)

"System of Rice Intensification (SRI) of cultivation is an advanced system of paddy planting and agriculture. Under this, alternate wetting and drying of paddy fields is done. Significantly, the system of Rice Intensification known as SRI - ie. System de Riziculture in French, is originated in Madagascar in 1980s and based on the cropping principles of significantly reducing plant population, improving soil condition and irrigation methods for root and plant development and improving plant establishment methods. It is worth mentioning here that under this type of cultivation reduced seed requirement and reduced methane production as well as reduced electricity consumptions are obtained. Thus we can say all three statements are true.

4. Consider the following crops –

1. Cotton 2. Groundnut

3. Rice 4. Wheat

Which of these are Kharif crops ?

- (a) 1 and 4 (b) 2 and 3 only
(c) 1, 2 and 3 (d) 2, 3 and 4

I.A.S. (Pre) 2013

Ans. (c)

In India, the cultivation season is divided into Kharif and Rabi. Kharif crops are sown mainly during June-July and harvested in September-October. Main crops of Kharif are as follows – Rice, Millet (Bajra and Jowar), Cotton, Soybean, Sugarcane, Maize, Groundnut, Red Chillies etc. In the given options, Wheat is a Rabi crop while rest crops are Kharif Crops.

5. The ideal climatic conditions for the cultivation of rice are:

- (a) rainfall above 100 cm, temperature above 25° C
(b) cool and moist climate for the entire crop period
(c) rainfall below 100 cm, temperature below 25° C
(d) warm and dry climate during the entire crop period

I.A.S. (Pre) 1994

Ans. (a)

Rice is a Kharif crop that requires an average temperature of 25°C and high humidity with the annual rainfall of above 100 cm. In the areas of less rainfall, it grows with the help of irrigation. Thus (a) is the correct answer.

6. Which one of the following is a Kharif Crop ?

- (a) Lentil (b) Linseed
(c) Mustard (d) Soyabean

U.P.P.C.S. (Spl) (Mains) 2004

Ans. (d)

On the basis of seasons, crops in India are mainly divided in there types.

- (i) **Kharif** – Rice, Jowar, Maize, Cotton, Soyabean, Groundnut, Millet, Ragi, Bajra, Jute etc.
(ii) **Rabi** - Wheat, Peas, Pulses, Mustard etc.
(iii) **Zaid** - Muskmelon, Watermelon, cucumber, Bitter gourd, Sunflower etc.

7. Which of the following is not a Kharif Crop?

- (a) Cotton (b) Groundnut
(c) Maize (d) Mustard

U.P.P.C.S.(Pre) 2012

Jharkhand PC.S. (Pre) 2011

Ans. (d)

See the explanation of the above question.

8. Which of the following is not a Kharif Crop?

- (a) Arhar or toor dal (b) Gram
(c) Maize (d) Rice

U.P.P.C.S (Mains) 2011

Ans. (b)

See the explanation of the above question.

9. Chief food crop of India is –

- (a) Wheat (b) Rice
(c) Maize (d) Pulses

U.P. Lower Sub. (Pre) 2004

41st B.P.S.C. (Pre) 1996

Ans. (b)

Rice is the chief food crop of India, Wheat is the second most important food crop of India. Thus, option (b) is correct answer.

10. Which of the following is the most important food crop in terms of cropped area?

- (a) Wheat (b) Maize
(c) Barley (d) Rice

40th B.P.S.C. (Pre) 2000

41st B.P.S.C. (Pre) 1996

Ans. (d)

According to Economic Survey 2024-25, rice occupies largest cropping area (47.8 million hectares). Wheat is grown on 31.8 million hectare area during 2023-24.

11. Which of the following crops occupies the largest area in India ?

- (a) Wheat (b) Sugarcane
(c) Maize (d) Rice

U.P.P.C.S. (Mains) 2011

Ans. (d)

See the explanation of the above question.

12. In India, the largest area under rice cultivation lies in the state of

- (a) Andhra Pradesh
(b) Orissa
(c) Uttar Pradesh
(d) West Bengal

U.P.P.C.S. (Mains) 2007

Ans. (c)

According to data Agriculture statistics at a Glance 2023, for the year 2022-23, the largest area under rice cultivation is in Uttar Pradesh (5.90 million hectares).

13. In India, per hectare average production of rice in the year 2013-14 was

- (a) 2419 kgs (b) 3059 kgs
(c) 2602 kgs (d) 770 kgs
(e) None of these

Chhattisgarh P.C.S. (Pre) 2014

Ans. (e)

Average production of rice per hectare in the year 2013-14 was 2416 kg. According to data from the Economic Survey 2023-24, this was 2882 kg/hectares, during 2023-24.

14. The region known as the Rice Bowl of India is –

- (a) Kerala and Tamil Nadu
(b) Delta region of Krishna-Godavari
(c) North East region
(d) Indus Gangetic Plain

40th B.P.S.C. (Pre) 1995

Ans. (b)

According to the given options, the delta region of Krishna and Godavari is known as the 'Rice Bowl of India'. This region comes under Andhra Pradesh. Rice is cultivated on 2.13 million hectare area (2022-23) of the total cropped area of Andhra Pradesh. Almost two third of total rice production is cultivated during the Kharif crop. Here, most important area for the production of rice is Rayalseema which is extended on Krishna-Godavari delta region. Thus, (b) is the correct answer.

15. In which of the following states, the productivity of rice is the highest ?

- (a) Punjab (b) U.P.
(c) Haryana (d) None of the above

U.P.P.C.S. (Mains) 2015

Ans. (a)

Highest productivity of rice in India is in Punjab which is 4193 kg/hectare as per 2022-23.

16. Which of the following is not a Variety of Rice?

- (a) Hansa (b) Jaya
(c) Jawala (d) Padma

Chhattisgarh P.C.S. (Pre) 2005

Ans. (c)

Important varieties of rice are –Jamuna, Karuna, Jaya, Kanchi, Jagannath, Krishna, Kaveri, Hansa, Vijaya, Padma, Annapurna, Bala and Ratna.

17. Jaya, Padma and Krishna are improved varieties of which of the following cereals ?

- (a) Rice (b) Wheat
(c) Barley (d) Maize

U.P.P.C.S. (Mains) 2006

Ans. (a)

See the explanation of the above question.

18. 'Aman' rice is grown during

- (a) April-May
(b) June-July
(c) November-December
(d) May-June

U.P.P.C.S. (Mains) 2011

Ans. (b)

Varieties of Rice	Time of Harvesting
1. Aman	June- July (sowing) to November- December (Harvesting)(winter crop)
2. Aus or Kar	May-June (sowing) to September October(Harvesting) (Autumn Crop)
3. Boro or Dalua	November-December (sowing) to March-April (harvesting)(Summer Crop)

19. Pusa Sugandha-5 is an aromatic variety of :

- (a) Maize (b) Red gram
(c) Rice (d) Sugarcane

U.P.P.C.S. (Mains) 2006

Ans. (c)

Pusa Sugandha-5 is an aromatic variety of rice.

20. 'Barani deep' is a variety of –

- (a) Pigeon pea (b) Maize
(c) Paddy (d) None of the above

U.P.P.C.S. (Mains) 2013

Ans. (c)

Barani deep, Narendra Sankar, Narendra Shuska Samrat, Lalmati etc are varieties of rice.

21. Which one of the following is a hybrid variety of Basmati rice?

- (a) Pusa RH- 10 (b) Pusa Sugandh - 3
(c) Pusa Basmati- 1 (d) Pusa Sugandh - 5

U.P.P.C.S. (Mains) 2015

Ans. (a)

Pusa RH-10 is a hybrid variety of Basmati Rice. Other hybrid varieties are PHB-71, Ganga, Suruchi, KRH-2, Sahyadri-4 etc.

22. The proper seed Ratio for transplanting of basmati rice is

- (a) 40-50 kg/ha (b) 20-30 kg/ha
(c) 15-20kg/ha (d) 5-10 kg/ha

U.P.R.O./A.R.O. (Pre) 2014

Ans. (c)

The proper seed ratio for transplanting of Basmati Rice is 15-20 Kg per hectare.

23. Consider the following statements and choose the correct code to answer –

Assertion(A) : Punjab is a major exporter of rice.

Reason(R) : This state leads in the rice production.

Code:

- (a) Both (A) and (R) are true, and (R) is the correct explanation of (A).
(b) Both (A) and (R) are true, but (R) is not the correct explanation of (A).
(c) (A) is false but, (R) is true
(d) (A) is true but, (R) is false

U.P.U.D.A./L.D.A. (Pre) 2001

Ans. (d)

When the question was asked option (d) was correct answer. Punjab is one of the major rice-producing States in India and exports rice to other states of India. According to data from the Economic Survey 2024-25, during the year 2023-24, Telangana is the leading/largest producer of rice followed by Uttar Pradesh at second place and West Bengal is the third largest rice producing state. Thus, assertion (A) is true but reason (R) is false, when the question was asked. Now option (a) stands correct as per data.

24. Which among the following states is the largest producer of rice in India ?

- (a) Andhra Pradesh (b) Madhya Pradesh
(c) West Bengal (d) Kerala

U.P.P.C.S. (Mains) 2006

Ans. (c)

See the explanation of the above question.

25. Which one of the following organisms can serve as a biofertilizer for rice crop?

- (a) Blue-green algae (b) Rhizobium

- (c) Mycorrhizal fungi (d) Azotobacter

I.A.S. (Pre) 2000

Ans. (a)

Blue-green algae, Azospirillum, Phosphobacteria, Azolla, etc. are used as biofertilizers for rice crop.

26. Assertion (A) : The Eastern coast of India produces more rice than the Western coast.

Reason (R) : The Eastern coast receives more rainfall than the Western coast.

Code :

- (a) Both (A) and (R) are true individually and (R) is the correct explanation of (A)
(b) Both (A) and (R) are individually true but (R) is not the correct explanation of (A)
(c) (A) is true but (R) is false
(d) (A) is false but (R) is true

I.A.S. (Pre) 2003

Ans. (c)

The western coast receives more rainfall than the eastern coast because the western coast is narrower than the eastern coast and has higher altitude mountains than eastern coast. The reason for rice production being more in the eastern coast is its suitable climate, soil and rainfall.

27. In India, during the last decade the total cultivated land for which one of the following crops has remained more or less stagnant?

- (a) Rice (b) Oilseeds
(c) Pulses (d) Sugarcane

I.A.S. (Pre) 2010

Ans. (a)

Crop	Cropped Area (In Million Hectares)		
	2010-11	2020-21	2023-24
Rice	42.9	45.8	47.8
Oilseed	27.2	28.8	30.2
Pulses	26.4	28.8	27.5
Sugarcane	4.9	4.9	5.7

The above data shows that the total cropped area for rice cultivation has remained stagnant. Cropped area of other crops has increased.

28. The states which account for more than half of the total rice production in India are –

- (a) West Bengal, Punjab, Tamil Nadu and Odisha
(b) West Bengal, Uttar Pradesh, Punjab, and Andhra Pradesh

- (c) Uttar Pradesh, West Bengal, Chhattisgarh and Assam
(d) Punjab, Andhra Pradesh, Bihar and Odisha.

U.P. Lower Sub. (Spl) (Pre) 2009

U.P. Lower Sub. (Pre) 2004

Ans. (b)

West Bengal, Uttar Pradesh, Punjab, and Andhra Pradesh account for more than half of the total rice production in India.

29. Arrange the following states of India in the ascending order of their rice production :

1. Andhra Pradesh
2. Punjab
3. Tamil Nadu
4. West Bengal

Select the correct answer from the codes given below:

- (a) 3, 4, 2, 1 (b) 4, 2, 3, 1
(c) 2, 3, 1, 4 (d) 3, 2, 1, 4

U.P.P.C.S. (Mains) 2003

Ans. (d)

When the question was asked option (d) was correct but according to the data for the year 2022-23 the current status (According to option) is as follows :

(States)	(Rice Production) (Million Tonnes)
Tamil Nadu	7.56
Punjab	12.99
Andhra Pradesh	7.94
West Bengal	15.48

30. The surplus producer of rice in India is –

- (a) Andhra Pradesh (b) Bihar
(c) Punjab (d) Tamil Nadu

U.P.P.C.S. (Mains) 2011

Ans. (a)

According to data for the year 2008-09, Andhra Pradesh had the highest market surplus ratio among the States given in the options. In the year 2014-15, Punjab is on top in this regard, followed by Haryana.

31. In India, rice is cultivated in the areas having over-

- (a) 20 cm annual rainfall (b) 30 cm annual rainfall
(c) 60 cm annual rainfall (d) 100 cm annual rainfall

U.P.P.C.S. (Mains) 2007

Ans. (d)

The water requirement for cultivation of rice crop is comparatively higher than any other crop. Rice is cultivated in areas having over 100 cm annual rainfall.

32. Which one of the following states has having the largest area under hybrid rice cultivation?

- (a) Bihar (b) Karnataka
(c) Punjab (d) Uttar Pradesh

U.P.P.C.S. (Mains) 2014

Ans. (d)

Uttar Pradesh has the highest area under the cultivation of the given hybrid rice.

33. In India four major producers of rice are –

- (a) Punjab, Uttar Pradesh, Tamil Nadu, Odisha
(b) Uttar Pradesh, West Bengal, Bihar, Assam
(c) West Bengal, Punjab, Uttar Pradesh, Andhra Pradesh
(d) West Bengal, Uttar Pradesh, Tamil Nadu, Punjab

U.P.P.C.S. (Spl) (Mains) 2004

Ans. (c)

At the time when this question was asked four major producers of rice were-West Bengal, Punjab, Uttar Pradesh and Andhra Pradesh. But According to the current data of the year 2023-24 the three states are as follows– Telangana, Uttar Pradesh and West Bengal.

34. Arrange the following states of India in descending order of their rice production and select the correct answer from the codes given below :

1. Andhra Pradesh 2. Punjab
3. Uttar Pradesh 4. West Bengal

Code :

- (a) 2, 1, 4, 3 (b) 3, 4, 1, 2
(c) 4, 1, 3, 2 (d) 4, 3, 2, 1

U.P.P.C.S. (Mains) 2009

Ans. (d)

When the question was asked option (d) was correct answer. The descending order of the States according to their rice production during 2022-23 is as follows-

(States)	Rice Production (Million Tonnes)
Uttar Pradesh	16.14
Telangana	15.88
West Bengal	15.48
Punjab	12.99

35. Among the Indian States, which state has the highest yield (per hectare) of rice?

- (a) West Bengal (b) Uttar Pradesh
(c) Haryana (d) Punjab

U.P. R.O./A.R.O. (Pre) 2017

Ans. (d)

Highest productivity of rice in India is in Punjab which is 4193 kg/hectare as per 2022-23.

36. Which of the following crops are grown mainly in the irrigated areas during Zaid ?

- (a) Arhar and Gram (b) Moong and Urad
(c) Rice and Millets (d) Maize and Groundnut

U.P.P.C.S. (Pre) 2011

Ans. (b)

Moong and Urad are the crops which are mainly grown in the irrigated areas during Zaid.

37. Which of the following is a zaid crop ?

- (a) Gram (b) Fodder
(c) Mustard (d) Cotton

70th B.P.S.C. Pre-2024

Ans. (b)

In the given options, fodder is a Zaid crop. In addition, crops like watermelon, muskmelon, cucumber, gourd and vegetables are cultivated during the Zaid season. Among other options, gram and mustard are Rabi crops, whereas cotton is a Kharif crop.

38. Which of the following crops is transplanted?

- (a) Mustard (b) Rice
(c) Wheat (d) Maize

U.P. R.O./A.R.O. (Mains) 2017

Ans. (b)

Paddy crop is transplanted. Transplanting is commonly practised as a method of Weed control for wet or puddled fields. It requires less seed but much more labour compared to direct seeding. The transplanted crops take longer to mature due to transplantation shock. Majority of the rice fields in Asia are manually transplanted.

39. Which of the following is not correct pair of crop and its leading producing State?

- (a) Rice : West Bengal
(b) Wheat : Uttar Pradesh
(c) Cotton : Gujarat

(d) Rape and Mustard : Rajasthan

(e) None of these

Chhattisgarh P.C.S. (Pre) 2017

Ans. (e)

According to the question period, option (e) was the correct answer. According to the year 2023-24, Telangana is the leading producer of rice, Uttar Pradesh of wheat, Rapeseed Mustard from Rajasthan and cotton from Gujarat.

40. Choose the correct sequence of the States of India, according to ascending order of rice production in the year 2018-19.

- (a) Punjab, Uttar Pradesh, Rajasthan, Haryana, Madhya Pradesh
(b) Uttar Pradesh, Punjab, Haryana, Madhya Pradesh, Rajasthan
(c) Rajasthan, Haryana, Madhya Pradesh, Punjab, Uttar Pradesh
(d) Punjab, Rajasthan, Haryana, Madhya Pradesh, Uttar Pradesh
(e) None of the above / More than one of the above

66th B.P.C.S. (Pre) (Re-Exam) 2020

Ans. (e)

According to figures from the Agriculture Statistics at a Glance, 2023 top 5 Rice production 2022-23 states in India are Uttar Pradesh, Telangana, West Bengal, Punjab and Chhattisgarh.

41. Consider the following States :

1. Punjab 2. Uttar Pradesh
3. Andhra Pradesh 4. West Bengal

Choose the correct sequence of the above in ascending order as rice producing States in India.

- (a) West Bengal, Punjab, Andhra Pradesh, Uttar Pradesh.
(b) West Bengal, Uttar Pradesh, Andhra Pradesh, Punjab.
(c) Andhra Pradesh, Uttar Pradesh, West Bengal, Punjab.
(d) Andhra Pradesh, Punjab, Uttar Pradesh, West Bengal.
(e) None of the above/More than one of the above.

67th B.P.S.C. (Pre.) 2022

Ans. (d)

When the question was asked option (d) was correct answer. According to the data for the year 2022-23 according to option the correct status is –
Andhra Pradesh < Punjab < West Bengal < Uttar Pradesh.
