

24. Co. 1148 is an important variety of

- (a) Wheat (b) Cotton
(c) Maize (d) Sugarcane

U.P. P.C.S. (Mains) 2017

Ans. (d)

Co. 1148 is an important variety of sugarcane.

Oilseeds

*Oilseed are the main source of fat in Indian food. Major oilseed crops are **Toria, Mustard, Sesame (til), Linseed, castor seed, Sunflower, Soyabean** etc.

***Yellow Revolution** is associated with the increase in the production of oilseed crops. Oil and oil cake obtained from oil seed is used in varnish, lubricant, candle, soap, fertilizer, aromatic substance etc.

*According to Economic Survey, 2024-25 data, total oilseed production in India in 2023-24 has been 39.7 million tonnes. *The largest producer of total oilseeds in India is **Rajasthan** followed by Madhya Pradesh and Gujarat. ***Peanut** is a major oilseed crop. Peanut are a good source of vegetable protein. Peanut are a tropical crop. 50 to 125 cm of average annual rainfall and 15°C to 25°C of temperature are sufficient for growing this crop. Peanut is also known as **Cashew of Poor**.

***Pegging** is a useful phenomenon in groundnut. In pegging, after fertilization, the pegs of the faded flower come out and enter the soil which grows quite close to the taproot. Once it penetrates the soil, the peg turns horizontal and continues to grow and mature into a peanut. For the cultivation of Peanut, the soil must have the enrichment of the **gypsum**.

*According to 2023-24 figure, the three leading Ground nut producing states in India are –

1. Gujarat (4.64 Million Tonnes)
2. Rajasthan (2.03 Million Tonnes)
3. Madhya Pradesh (0.98 Million Tonnes)

*Soyabean is a good source of protein in addition to the food oil. Favourable condition for soyabean cultivation are temperature ranging between 15-25°C, average annual rainfall of 40-60 cm and loamy soil with a pH ranging between 6-6.5.

*Soyabean is a cultivated as a Kharif crop generally sown in June and harvested in October. This crop requires irrigation 3 to 4 times.

*According to data from SOPA for, 2024 in India, 52,009 Lakh hectare area of Madhya Pradesh is cropped under

soyabean which is **43.95%** of total cropping area of Soyabean in India.

*The three leading producer states of Soyabean as per Economic Survey 2024-25, In the year 2023-24 are–

1. Madhya Pradesh (5.47 Million tonnes)
2. Maharashtra (5.26 Million tonnes)
3. Rajasthan (1.17 Million tonnes)

*Mustard is also a major oilseed crop. It is a Rabi crop. For the cultivation of mustard the temperature ranging between 15-25°C and an annual rainfall of 75-100 cm is required.

It is sown in the month of October-November and harvested in the months of **February-March**.

*According to the Economic Survey 2024-25 data, in the year 2023-24, **Rajasthan** is first in Rapeseeds and Mustard Production in India followed by Uttar Pradesh (2nd) and Madhya Pradesh (3rd). The major varieties of mustard are **pusa bold, Pusa, Jai kisan** and **Varuna**. **Pitambari** is a species of **yellow mustard (RYSK-05-02)**.

1. Which of the following is the oilseed crop?

- (a) Masoor (b) Lobia
(c) Sunflower (d) Barseem

Uttarakhand U.D.A./L.D.A. (Pre) 2003

Ans. (c)

Main oilseed crops produced in India are Groundnut, Mustard, Coconut, Soyabean, Castor seeds, Cotton seeds, Linseed and Sunflower. Hence, option (c) is the correct answer.

2. Yellow Revolution is related to –

- (a) Production of Foodgrain
(b) Production of Oilseeds
(c) Production of Milk
(d) Production of Fish.

U.P.P.C.S. (Mains) 2004
U.P. Lower Sub. (Pre) 2002

Ans. (b)

Yellow Revolution is related to the production of oilseeds and Green Revolution is related to the production of foodgrain. White Revolution is related to the production of milk and the Blue Revolution is related to the production of fish.

3. Yellow Revolution is related to –

- (a) Pulse production (b) Paddy production
(c) Fish production (d) Oilseed production

U.P.R.O./A.R.O. (Mains) 2014

Ans. (d)

See the explanation of above question.

4. 'Yellow Revolution' in India is related to which of the following?

- (a) Agricultural production
- (b) Oilseeds production
- (c) Fish production
- (d) Pulse production

U.P. P.C.S. (Mains) 2017

Ans. (b)

See the explanation of above question.

5. Which is the most suitable crop for dryland farming?

- (a) Sugarcane
- (b) Jute
- (c) Wheat
- (d) Groundnut

45th B.P.S.C.(Pre) 2001

Ans. (d)

Dryland agriculture refers to growing of crops entirely under Rainfed conditions. Groundnut is the most suitable crop for dryland farming. It is a tropical plant requires a long and warm growing season. It grows well in area receiving 50 to 125 cm. annual rainfall of well distributed rainfall during growing season. Dryland farming is a type of dryland agriculture which is suitable for the cultivation of crops in areas receiving rainfall upto 100 cm.

6. 'Pegging' is a useful phenomenon in –

- (a) Sugarcane
- (b) Sweet potato
- (c) Groundnut
- (d) Tapioca

U.P. U.D.A./L.D.A. (Mains) 2010

Ans. (c)

Pegging is a useful phenomenon in groundnut. In pegging, after fertilization, the pegs of the faded flower come out and enter the soil which grows quite close to the taproot. Once it penetrates the soil, the peg turns horizontal and continues to grow and mature into a peanut.

7. Which of the following states is the leading producer of Soyabean ?

- (a) Maharashtra
- (b) Madhya Pradesh
- (c) Punjab
- (d) Kerala

U.P.P.C.S. (Pre) 2015

U.P.P.C.S. (Pre) 2003

Uttarakhand U.D.A./LDA (Pre) 2003

U.P. U.D.A./L.D.A. (Pre) 2001

M.P.P.C.S. (Pre) 2000

Ans. (b)

When the question was asked option (b) was correct answer. According to Economic Survey 2024-25, for year 2023-24, three largest producers of soyabean in India are –
1. Madhya Pradesh (5.47 million tonnes)
2. Maharashtra (5.26 million tonnes)
3. Rajasthan (1.17 million tonnes)
Thus, Madhya Pradesh is the leading soyabean producer in India.

8. The leading producer of Soybean in India is

- (a) Uttar Pradesh
- (b) Bihar
- (c) Madhya Pradesh
- (d) Rajasthan

U.P.P.C.S. (Mains) 2007

Uttarakhand U.D.A./L.D.A. (Pre) 2007

Uttarakhand U.D.A./L.D.A. (Mains) 2006

U.P.P.C.S. (Pre) 2005

Ans. (c)

See the explanation of above question.

9. Which of the following is the leading soyabean producing state?

- (a) Maharashtra
- (b) Madhya Pradesh
- (c) Uttar Pradesh
- (d) Gujarat

Chhattisgarh P.C.S. (Pre) 2018

Ans. (b)

See the explanation of the above question.

10. Which state of India occupies the largest area under Soya bean cultivation?

- (a) Madhya Pradesh
- (b) Rajasthan
- (c) Uttar Pradesh
- (d) Punjab

U.P.P.C.S. (Mains) 2014

Ans. (a)

According to the data of SOPA for the year 2024 Madhya Pradesh occupies 52.009 Lakh Hectare land, which is 43.95 percent of the total land used for soyabean cultivation in the country.

11. During 1992-93 there was a record production in

- (a) Rice
- (b) Sugarcane
- (c) Pulses
- (d) Oilseeds

I.A.S. (Pre) 1993

Ans. (d)

India witnessed record production of oilseeds in 1992-93. During that year, the total oilseed production was 20.11 million tonnes. There was again record production of oilseeds in 2010-11 with 32.48 million tonnes. Notably, during 2023-24, oilseed production in the country was 39.7 million tonnes.

12. The Largest producer of oilseeds in India is :

- (a) Gujarat
- (b) Madhya Pradesh

- (c) Rajasthan (d) Uttar Pradesh

U.P.P.C.S. (Mains) 2006

Ans. (b)

When this question was asked and 2018-19 data, Madhya Pradesh is the largest producer of oilseeds in India. According to Economic Survey 2024-25, for year 2023-24, Rajasthan is the largest producer of oilseeds in India.

13. During the year 2020-21, which of the following States was the largest producer of groundnut in the country?

- (a) Andhra Pradesh (b) Gujarat
(c) Rajasthan (d) Tamil Nadu

M.P.P.C.S. (Pre) 2022

Ans. (b)

During the year 2020-21, Gujarat was the largest producing state of groundnut in the country.

Notably, according to the Economic Survey 2024-25, during the period of 2023-24 three largest state of Groundnut are - Gujarat, Rajasthan, Madhya Pradesh respectively.

14. Which of the following states is the largest producer of groundnut in India ?

- (a) Tamil Nadu (b) Madhya Pradesh
(c) Rajasthan (d) Gujarat

U.P.P.C.S. (Mains) 2006

Ans. (d)

Gujarat was the leading producer of groundnut when this question was asked. According to data for the year 2023-24, three leading producers of groundnut are – Gujarat Rajasthan and Madhya Pradesh.

15. The State of India with low acreage, but very high per hectare yield of groundnut is

- (a) Uttar Pradesh (b) West Bengal
(c) Punjab (d) Chhattisgarh

U.P.P.C.S. (Mains) 2014

Ans. (c)

When the question was asked option (c) was correct answer. According to data Agricultural Statistics at a Glance, 2023, in the year 2022-23, top three States in the terms of productivity per hectare of groundnut are - 1. Tamil Nadu, 2. Gujarat, 3. West Bengal.

16. Find the odd product out of the following :

- (a) Sesame (b) Groundnut
(c) Caster seed (d) Mustard

R.A.S./R.T.S.(Pre) 2010

Ans. (*)

Groundnut is obtained from the root of the plant while rest of the crops are obtained from the flower of the plant. Oil made of Sesame, Groundnut and Mustard is used in food while castor seed oil is not used in food.

17. Rajasthan is the chief producer of –

- (a) Gram (b) Mustard
(c) Cotton (d) Wheat

Uttarakhand U.D.A./L.D.A. (Mains) 2007

Ans. (b)

When the question was asked only option (b) was correct. According to the data for the year 2023-24, Rajasthan is the chief producer of rapeseed and mustard.

18. Consider the map given below –

The place marked A, B, C and D in the map are respectively known for the cultivation of :

- (a) Groundnut, Ragi, Tobacco and Sugarcane
(b) Groundnut, Sugarcane, Ragi and Tobacco
(c) Ragi, Sugarcane, Groundnut, and Tobacco
(d) Ragi, Groundnut, Sugarcane and Tobacco

I.A.S. (Pre) 1997

Ans. (b)

The places marked A, B, C and D in the map are in Gujarat, Maharashtra, Odisha and Andhra Pradesh respectively. These States are particularly known for the cultivation of –

Gujarat	-	Groundnut
Maharashtra	-	Cotton and sugarcane
Odisha	-	Ragi
Andhra Pradesh	-	Tobacco

Thus, option (b) is the correct answer.

19. Major oilseeds produced in India are-

1. Sesamum
2. Mustard
3. Groundnut
4. Soybean

Which of the following options represents correct decreasing order of the production of above oilseeds?

- (a) 1,2,3,4 (b) 3,2,4,1
