

Code :

	A	B	C	D
(a)	4	2	3	1
(b)	4	3	2	1
(c)	3	4	1	2
(d)	3	2	1	4

U.P.P.C.S. (Pre) 2017

Ans. (a)

The correct match of List-I and List-II is as follows :

Area	Shifting Cultivation
Western Ghat	- Kumari
South-east Rajasthan	- Waltre
North-east India	- Jhum
Madhya Pradesh and Chhattisgarh	- Dahiya

8. Which is not a correct match?

Shifting Agriculture	State
(a) Pondu	– Odisha
(b) Mashan	– Himachal Pradesh
(c) Poonam	– Kerala
(d) Jhoom	– Assam

R.A.S./R.T.S. (Pre) 2018

Ans. (b)

Shifting Agriculture	State
Pondu	– Odisha
Mashan	– Madhya Pradesh
Poonam	– Kerala
Jhoom	– Assam

Hence option (b) is not correctly matched.

Agriculture : Miscellaneous

According to the Economic Survey 2024-25, as per data for 2023-24, total food grain production in India is estimated at a record 332.3 million tonnes.

*According to the Final Estimates for 2023-24 in India, the production of rice is 137.8 million tonne, production of wheat is 113.3 million tonne, production of nutri/coarse cereals (Includes Maize, Jowar, Ragi, Bajra, Small Millets and Barley) is 56.9 million tonnes and production of pulses is 24.3 million tonne.

*According to figures 2023-24 **Uttar Pradesh** is top food grain producing state with a share of 18.14% in total food grain production of the country. In this context, Madhya Pradesh (12.48%) is at second and Punjab (9.79%) is at third place.

***National Research Centre for Banana** was established by

Indian Council of Agricultural Research (ICAR) on August 21, 1993. This centre works on four major thrust areas of research viz., crop improvement, crop production, post harvest management and crop protection. According to the figures of 2023-24 (Final) three leading states in the production of Banana in India are **Maharashtra, Andhra Pradesh, and Tamil Nadu** respectively.

*The botanical name of Maize is '**Zea Mays**'. It is a major food crop. Due to its compatibility to diverse agro-climatic conditions, it can be sown throughout the year. At the global level, it is called as the "**Queen of cereals**". Maize is used in the production of starch products such as starch powder, Dextrin, Seatex etc. Besides this, maize oil is also used for the production of **Bio-Diesel**. *Many types of **alcoholic drinks** such as whisky (American Alcohol), Cauim (Beer of Brazil), etc are also prepared by using maize. *In India, Maize is the third largest foodgrain crop in production and consumption after rice and wheat. The maturity period of maize is almost **90 to 150** days depending on season and region. The maturity period of Maize in the state of Uttar Pradesh, Bihar, Madhya Pradesh etc. is about 90 to 150 days.

*According to Economic Survey 2024-25. The three leading Maize producing states 2023-24 in India are **Karnataka, Bihar and Madhya Pradesh** respectively.

***Shaktiman-I** and **Shaktiman-II** are genetically hybrid varieties of Maize.

*The credit is given to Fredrick Wilson to start farming of **kidney bean** and **potato** in the Bhagirathi valley. In the 19th century, he was the first man to settle permanently in the Bhagirathi Valley. He was given the nickname of Pahadi and the king of Harshil.

*According to the data of Department of Agriculture & Farmers Welfare in the year 2023-24 (Final estimate), Uttar Pradesh is the largest producer of Potato in the country, about **19173** Thousand M.T. of the country's total production of Potato is produced in U.P. followed by West Bengal and Bihar respectively. *The best variety of potatoes for processing is **kufri chip Sona-2**. **Chipsona-3** is the best variety of potatoes for processing in plains and **Kufri Him Sona** is the best variety of Potatoes for processing in hilly areas. *The climate of lower Ganga plains contains high temperature with high humidity. Paddy and Jute crops are most suitable for this type of climate. Jute is produced in an **alluvial loamy soil**. In India, West Bengal is the largest producer (2023-24) of Jute & Mesta followed by Bihar and Assam. It is known as the '**golden fibre**'. '**Mesta**' is a variety of Jute. According to data 2022-23. West Bengal (0.52 million hectare) has the largest Jute cultivated area in India.

*In the Union Territory of Jammu and Kashmir, **Saffron** is

produced on a commercial level. It is also called as Zafran. The other saffron producing countries except India are Spain, Iran, Greece and Italy. Green hair disease is found in Millets. *For the cultivation of onion, first seeds are planted and small plants are prepared and later those plants are transplanted. As per 2023-24 (Final) data, the onion leading three states of India are Maharashtra (35.44%), Madhya Pradesh and Gujarat.

According to the National Horticulture Board 2023-24 (Final) in India, the main mango producing states are Uttar Pradesh, Andhra Pradesh, Bihar, Karnataka and Gujarat respectively. ***Sindhu** is a seedless variety of mango. This is the only seedless mango variety of the world.

***Aamrapali** variety of Mango was developed by the Indian Agriculture research institute Pusa in the year 1971 by hybridisation of Dasahari and Neelam varieties of Mango.

***Lalit** and **Banarsi** are the advance varieties of Guava. This variety of Guava is developed by Indian Institute of Horticulture Research.

***Indian Gooseberry** has medicinal significance. **Kanchan**, **Krishna** and **Banarasi** are improved varieties of Indian Gooseberry (Amla). Vitamin C is abundantly found in it.

*Stem of ginger which grows in the soil and stores food is known as the rhizome.

***Lobia**, **Moong** and **Arhar** are used as food, fodder and Pulses.

***Groundnut**, **sesame** and **Bajra** are grown in dry Agricultural regions. Irrigation of these crops totally depends on rain.

*The main objective of **National Food Security Mission** is to increase the production of rice, wheat and pulses through area expansion and productivity enhancement in a sustainable manner in identified districts of the country restoring soil fertility and productivity at individual farm level; creation of employment opportunities and enhancing farm level economy (i.e., farm profits) to restore confidence among farmers.

*India and Pakistan produce about 80% of the world total production of **cluster bean**. After proving the importance of **Guar Gum** in the extraction of Shale gas, a tremendous increase in its demand has been recorded. Guar Gum is extracted from the seeds of cluster Bean.

*According to the data Handbook on Fisheries Statistics, 2023 released by Ministry of Fisheries, Animal Husbandary and Dairying for the year 2022-23 the leading Inland and Marine fish producing states are-

(1) **Andhra Pradesh** (51.06 Lakh Tonnes) (2) **West Bengal** (20.45 Lakh Tonnes) (3) **Karnataka** (12.25 Lakh Tonnes), (4) **Odisha** (10.52 Lakh Tonnes) and (5) **Kerala** (9.21 Lakh Tonnes). Freshwater fish production is largest produced in Andhra Pradesh.

*Arunachal Pradesh is emerging as a major tourist destination in north-eastern India. There is a very rich biodiversity of flora and fauna. The state is famous for Green forests, wild-life diversity, deep river valleys and beautiful plateau. It is home to a different variety of orchid.

Sikkim achieved the status of India's first biological / organic state. It is notable that producing crops based on organic fertilizers completely or in other words without using pesticides or chemical fertilizers is called **organic farming**.

Borlaug Award is given in the field of Agricultural Science. This award was started in the year 1972 after the name of Nobel Prize Winner Norman. E. Borlaug.

1. Colour of the tag used on certified seed bags is :

- (a) blue (b) purple
(c) white (d) golden yellow

U.P. R.O./A.R.O. (Pre) (Re-Exam) 2016

Ans. (a)

Seeds are classified as follows :

1. Breeder seeds - These are the basic source of seed production are developed at research center lahs and agricultural universities. A golden colour tag is placed on this bag.
2. Foundation seeds : Foundation seeds are developed from breeding seed under the supervision of the certifying body. It has a tag with white colour.
3. Certified seeds : These are produced from foundation seeds. The certifying body issues it when it conforms to prescribed standards. A blue tag is placed on its bag.

2. Which of the following crops in India was losing area under cultivation since 1980-81 to 2011-12?

- (a) Wheat (b) Rice
(c) Pulses (d) Coarse Cereals
(e) None of these

Chhattisgarh P.C.S (Pre) 2013

Ans. (e)

According to agricultural statistics data, the area under cultivation of none of the crops given in the options has continually decreased from 1980-81 to 2023-24.

Crop	Area under cultivation (million hectare)	
	1980-81	2023-24
Wheat	22.28	31.8
Rice	40.15	47.8
Pulses	22.46	27.5
Coarse Cereals	41.78	24.9

Although the cropped area of coarse cereals has decreased from 1980-81 to 2023-24, however, there has been fluctuation in between and it has not continuously decreased. Hence option (e) is correct.

3. Which of the following pairs of states and their important crops are correctly matched –

- | | | |
|----------------|---|-----------|
| 1 Kerala | - | Tapioca |
| 2 Maharashtra | - | Cotton |
| 3. West Bengal | - | Flax |
| 4. Gujarat | - | Groundnut |

Code :

- | | |
|----------------|----------------|
| (a) 1, 2 and 3 | (b) 1, 2 and 4 |
| (c) 1, 3 and 4 | (d) 2, 3 and 4 |

I.A.S. (Pre) 1996

Ans. (c)

When the question was asked option (c) was correct answer, state mentioned in the question and their Important crops are as follows:

Tamil Nadu (2023-24) - Tapioca (First Producer)

Gujarat (2023-24) - Cotton (First Producer)

West Bengal (2023-24) - Jute and Mesta (First Producer)

Gujarat (2023-24) - Groundnut (First Producer)

4. Which one of the following pairs is not correctly matched?

- | Crop | Largest producer |
|-------------|------------------|
| (a) Potato | - Uttar Pradesh |
| (b) Coconut | - Kerala |
| (c) Banana | - Maharashtra |
| (d) Tobacco | - Andhra Pradesh |

U.P.P.C.S (Mains) 2011

U.P.P.C.S. (Spl) (Pre) 2008

Ans. (c)

When this question was asked option (c) was correct answer. Crops mentioned in the question and their important state are as follows :

Potato (2023-24) - Uttar Pradesh (First Producer)

Coconut (2023-24) - Karnataka (First Producer)

Banana (2023-24) - Maharashtra (First Producer)

Tobacco (2022-23) - Gujarat (First Producer)

5. In which of the following states of India was the potato production maximum in 2013?

- | | |
|-------------------|--------------------|
| (a) Uttar Pradesh | (b) West Bengal |
| (c) Bihar | (d) Madhya Pradesh |

U.P.P.S.C. (R.I.) 2014

Ans. (a)

See the explanation of above question.

6. National Research Centre for Banana is located at

- | | |
|----------------|--------------|
| (a) Trichy | (b) Bhusawal |
| (c) Saharanpur | (d) Pune |

U.P.R.O./A.R.O (Mains) 2014

Ans. (a)

National Research Centre for Banana (NRCB) was established on 21st August, 1993 at Tiruchirappalli (Trichy), Tamil Nadu. It aims to increase the production and productivity of Banana and plantation through mission mode and strategic research approaches.

7. In the map given below four areas are differently shaded, three of which indicate cereal crop production areas and one indicates a non-cereal crop production area.

As per the index is given, the non-cereal crop production area is :

- | | | | |
|-------|-------|-------|-------|
| (a) 1 | (b) 2 | (c) 3 | (d) 4 |
|-------|-------|-------|-------|

I.A.S. (Pre) 1995

Ans. (d)

As per the given Index in the map, the place marked as "4" which includes Rann of Kutch in Gujarat, western Madhya Pradesh and some part of Maharashtra indicates Non-Cereal crop production area

8. Which of the following is the correct decreasing order of production of the given food grain in India?

- | |
|--|
| (a) Wheat – Rice – Pulses – Coarse Grain |
| (b) Rice – Wheat – Pulses – Coarse Grain |
| (c) Wheat – Rice – Coarse Grain – Pulses |
| (d) Rice – Wheat – Coarse Grain – Pulses |

I.A.S. (Pre) 2007

Ans. (d)

As per the final estimates data for 2023-24, production data of the given food grains is as follows –

Rice	–	137.8 million tonnes
Wheat	–	113.3 million tonnes
Coarse grain	–	56.9 million tonnes
Pulses	–	24.3 million tonnes

Thus, the correct answer is option (d).

9. The state of India, which has the largest share in food-grain production, is –

- (a) Punjab (b) Haryana
(c) Maharashtra (d) Uttar Pradesh

U.P.P.C.S. (Pre) 2008
R.A.S./R.T.S. (Pre) 2003

Ans. (d)

According to the data released in 2023-24 (Final), Uttar Pradesh is the largest food-grain producing State in India with its share of 18.14 percent. In this regard Madhya Pradesh (12.48%) is the second and Punjab (9.79%) is the third largest producer of food grain in India.

10. The State of India which stands first in the production of cotton, groundnut, salt and milk is –

- (a) Maharashtra (b) Punjab
(c) Rajasthan (d) Gujarat

R.A.S./R.T.S.(Pre) 2007

Ans. (d)

Gujarat in India was the leading producer of cotton, groundnut, salt and milk when this question was asked. Presently, According to the question Gujarat in India is the leading producer of cotton (2023-24), Groundnut (2023-24) and Salt (2023-24). Uttar Pradesh in India is the leading producer of milk (2023-24).

11. Match List- I with List- II and select the correct answer using the codes given below the lists :

- | List- I
(Agricultural products) | List- II
(Foremost producer) |
|------------------------------------|---------------------------------|
| A. Cotton | 1. Madhya Pradesh |
| B. Gram | 2. Gujarat |
| C. Black pepper | 3. West Bengal |
| D. Pineapple | 4. Kerala |

Codes :

- | | A | B | C | D |
|-----|---|---|---|---|
| (a) | 2 | 1 | 4 | 3 |
| (b) | 2 | 1 | 3 | 4 |
| (c) | 1 | 2 | 4 | 3 |
| (d) | 1 | 2 | 3 | 4 |

I.A.S. (Pre) 1998

Ans. (a)

When the question was asked option (a) was correct. Correct match as data is as follows –

Cotton 2023-24	Gujarat (top producer)
Gram 2023-24	Madhya Pradesh (top producer)
Pineapple 2023-24	West Bengal (top producer)
Black pepper 2023-24	Karnataka (top producer)

12. Match the Crops shown in column-I to States given in Column-II, where they are grown maximum:

- | Column-I
(Crops) | Column-II
(States) |
|---------------------|-----------------------|
| A. Ragi | 1. Karnataka |
| B. Bazra | 2. Maharashtra |
| C. Jowar | 3. Rajasthan |
| D. Urad | 4. Madhya Pradesh |

Code :

- | | A | B | C | D |
|-----|---|---|---|---|
| (a) | 1 | 2 | 3 | 4 |
| (b) | 1 | 3 | 2 | 4 |
| (c) | 3 | 4 | 2 | 1 |
| (d) | 1 | 4 | 3 | 2 |

Chhattisgarh P.C.S. (Pre), 2022

Ans. (b)

Correct match is following :

- | Crops | States |
|-------|----------------|
| Ragi | Karnataka |
| Bazra | Rajasthan |
| Jowar | Maharashtra |
| Urad | Madhya Pradesh |

13. Which of the following is not correctly matched?

- | Agricultural Produce
(2015) | State |
|--------------------------------|-------|
|--------------------------------|-------|

- (a) The largest producer of coffee - Karnataka
(b) The largest producer of potato - Madhya Pradesh
(c) The largest producer of cotton - Gujarat
(d) The largest producer of wheat - Uttar Pradesh

U.P.P.C.S. (Mains) 2016

Ans. (b)

When the question was asked answer (b) was correct. Presently, the correct match of agricultural produce with their States is as follows :

Agricultural Produce	State
The largest producer of potato 2023-24	Uttar Pradesh
The largest producer of cotton 2023-24	Gujarat
The largest producer of wheat 2023-24	Uttar Pradesh

14. Correctly match list-I with list-II and select the correct answer from the codes given below-

- | List-I
(crops) | List-II
(Crop destroying creatures) |
|-------------------|--|
| A. Rice | 1. Aphid |
| B. Wheat | 2. Ghundi Bag |

- C. Sugarcane 3. Oily shearing Grasshopper
D. Gram 4. Top shoot borer moth
 5. Bollworm

Codes :

	A	B	C	D
(a)	2	3	4	5
(b)	3	1	2	4
(c)	2	1	4	5
(d)	5	4	1	3

I.A.S. (Pre) 1994

Ans. (c)

Aphid is the creature which harms wheat as well as other cereals and fruits. In the same way, Ghundi Bag harms rice crop and Top Shoot Borer Moth destroys the sugarcane crop while Bollworm is harmful to the gram.

15. Match List-I with List-II and select the correct answer from the codes given below :

List - I (Name of the Crop)	List- II (Name of Disease)
A. Sugarcane	1. Late Blight
B. Paddy	2. Red Rot
C. Arhar	3. Khaira
D. Potato	4. Wilt

Code :

	A	B	C	D
(a)	1	2	3	4
(b)	2	3	4	1
(c)	3	2	1	4
(d)	4	3	2	1

U.P.P.C.S. (Mains) 2014

Ans. (b)

Correctly matched list of crops and diseases is as follows :

(Name of Crop)	(Name of Disease)
Sugarcane	- Red rot
Paddy	- Khaira
Arhar	- Wilt
Potato	- Late Blight

16. Which of the following is not correctly matched ?

- (a) Rice - Green hair
(b) Bajra - Ergot
(c) Pea - Powdery mildew
(d) Gram - Wilt

U.P. Lower Sub. (Pre) 2015

Ans. (a)

Green hair disease is found in millet. Rest others are correctly matched.

17. Sugarcane, Beatroot, Sweet pea, Gram, Arhar and Fras- bean come under which of the following :

- (a) Two plant family (b) Three plant family
(c) Four plant family (d) Five plant family

I.A.S. (Pre) 1993

Ans. (b)

Sugarcane, Beatroot, Sweet Pea, Gram, Arhar and Frasebean come under the category of three plant family.

18. India is the largest producer of

- (a) Coffee (b) Sugarcane
(c) Oilseeds (d) Tobacco

U.P. U.D.A./L.D.A. (Mains) 2010

Ans. (*)

India is not the largest producer of any of the above crops. India ranks second in sugarcane production (FAO, 2023) and 9th in coffee green and second in Tobacco (Unmanufactured). Hence, none of the options is correct as per (FAO, 2023).

19. What was the estimated production of foodgrains in India for the year 2011-12?

- (a) 230 million tonnes (b) 210 million tonnes
(c) 257 million tonnes (d) 280 million tonnes
(e) 305 million tonnes

Chhattisgarh P.C.S (Pre) 2013

Ans. (*)

Estimated production of food grains in 2011-12 in India was 259.29 million tonnes (as per the last estimate). Therefore none of the given options can be taken as the correct answer. Chhattisgarh public service commission also deleted this question in their revised answer sheet and excluded it from the evaluation process. Total foodgrain production in 2023-24 is 332.3 million tonnes estimated.

20. Consider the following statements:

1. India ranks first in the world in fruit production
2. India ranks second in the world in the export of tobacco

Which of these statements is/are correct?

- (a) Only 1 (b) Only 2
(c) Both 1 and 2 (d) Neither 1 nor 2

I.A.S. (Pre) 2003

Ans. (*)

When the question was asked option (d) was correct. As per the statistics is given by the Food and Agriculture Organization (FAO 2023), India is first place fruits producing (Other fruits, n.e.c.) country. India is the second largest exporter (in quantity) of tobacco (Unmanufactured) in the world according to export value (FAO, 2023).

21. Consider the following statements about the Jute cultivation in India:

I. Jute is a Rabi crop

II. Jute crop requires humid climate with high temperature

III. The cultivation of Jute in India is mainly confined to the eastern region of the country

Which of the following statements is/are correct?

- (a) Only I is correct
- (b) Only II and III are correct
- (c) I, II and III all are correct
- (d) Only I and III are correct

Chhattisgarh P.C.S. (Pre) 2020

Ans. (b)

Jute is a kharif crop. High temperatures (24°C to 35°C), heavy rain (125-200 cm) and low plain land are favourable conditions for its cultivation. West Bengal, Bihar, Assam, Odisha and Madhya Pradesh are the major Jute producing states.

22. Given below are two statement is labelled as Assertion (A) and the other as Reason (R).

Assertion (A) : Jute is an indigenous plant of India.

Reason (R) : Jute is a Kharif crop sown from February to June and harvested from July to October.

Select the correct answer from the codes given below:

- (a) Both (A) and (R) are true and (R) is the correct explanation of (A).
- (b) (A) is false, but (R) is true.
- (c) Both (A) and (R) are true, but (R) is not the correct explanation of (A).
- (d) (A) is true, but (R) is false.

UPPSC (Pre) 2024

Ans. (c)

Raw Jute includes both Jute and Mesta. Jute is an indigenous plant of India. The primary centre of origin of white Jute is africa, while the secondary center of origin is India or the India-Myanmar region. The sowing time of jute varies across regions depending on pre-monsoon rainfall, moisture availability and crop variety. Generally it is sown between March and May, but some varieties can be sown from February to June. Jute is harvested between July and October. Thus, both (A) and (R) are correct, but (R) does not provide the correct explainaion of (A).

23. Given below are two statements, in which one is labelled as Assertion (A) and the other as Reason (R):
Assertion (A) : India is the largest producer of Jute in the world.

Reason (R) : India's Jute production increased due to Yellow Revolution.

Select the correct answer using the code given below:

Code :

- (a) (A) is false but (R) is true.
- (b) Both (A) and (R) are true but (R) is not correct explanation of (A).
- (c) (A) is true but (R) is false.
- (d) Both (A) and (R) are true and (R) is the correct explanation of (A).

U.P. R.O./A.R.O. (Pre) 2023

Ans. (c)

According to National Jute Board, India is the largest producer of raw jute and jute goods in the world. Yellow Revolution is related to oilseed production. Hence, Assertion (A) is true but Reason (R) is false.

24. The largest Jute producing state in India is –

- (a) Andhra Pradesh
- (b) Bihar
- (c) Tamil Nadu
- (d) West Bengal

41st B.P.S.C. (Pre) 1996

Ans. (d)

According to the figures released in 2023-24, the largest Jute & Mesta producing state in India is West-Bengal followed by Bihar and Assam.

25. The Jute Industry in India is mainly concentrated in

- (a) Kerala
- (b) Orissa
- (c) Uttar Pradesh
- (d) West Bengal

U.P.P.C.S. (Spl) (Mains) 2004

Ans. (d)

Jute is produced in a loamy soil. West Bengal is the major producer (2023-24) of jute & Mesta in India.

26. The lower Gangetic plain is characterized by a humid climate with high temperature throughout the year. Which one among the following pairs of crops is most suitable for this region?

- (a) Paddy and Cotton
- (b) Wheat and Jute
- (c) Paddy and Jute
- (d) Wheat and Cotton

I.A.S. (Pre) 2011

Ans. (c)

Lower Gangetic plain provides humid climatic conditions with high temperature which are suitable for the production of paddy and jute crop.

27. Largest area under jute cultivation in India is in –

- (a) Assam (b) West Bengal
(c) Bihar (d) Meghalaya

U.P.P.C.S. (Pre) 2007

Ans. (b)

According to the data Agricultural Statistics at a Glance, 2023 in 2023-24, the area under jute & Mesta cultivation in the give States is as follows –

West Bengal	0.52 million hectare
Bihar	0.06 million hectare
Assam	0.06 million hectare

Thus, West Bengal has the largest area under jute & Mesta cultivation.

28. Which of the following group belongs to fibre crop?

- (a) Patsan, Gram, Linseed
(b) Lentil, Oat, Dhaicha
(c) Cotton, Jute, Sunhemp
(d) Jute, Wheat, Cotton

U.P. P.C.S. (Mains) 2017

Ans. (c)

Cotton, Jute and Flax are related to fiber crops. It is known that in India the maximum production (2023-24) of cotton is in Gujarat and the production of Jute & Mesta (2023-24) is in West Bengal.

29. Which of the following crops is grown throughout the year?

- (a) Black gram (b) Wheat
(c) Mustard (d) Maize

U.P. Lower Sub. (Pre) 2015

Ans. (d)

Maize popularly known as 'Corn' is one of the most versatile cash crop having wider adaptability under varied climatic conditions which can be grown throughout the year. It is called the Queen of Cereals globally.

30. Maize crop can be grown during –

- (a) Kharif Season
(b) Rabi Season
(c) Zaid Season
(d) Throughout the year

U.P.P.C.S. (Pre) 2007

Ans. (d)

See the explanation of above question.

31. Consider the following statements :

1. Maize can be used for the production of starch.
2. Oil extracted from maize can be a feedstock for biodiesel.
3. Alcoholic beverages can be produced by using maize.

Which of the statements given above is/are correct?

- (a) 1 only (b) 1 and 2 only
(c) 2 and 3 only (d) 1, 2 and 3

I.A.S. (Pre) 2014

Ans. (d)

Maize is used for the production of starch powder and starch products like dextrin and cyatex. Also oil from maize can be used for biodiesel. By using maize, various types of alcoholic beverages such as corn whisky (American– wine) and choweime (Brazilian beer) are produced.

32. Maturity period of the Maize crop is :

- (a) 40 days (b) 60 days
(c) 140 days (d) 110 days

R.A.S./R.T.S.(Pre) 1999

Ans. (d)

Maize is the largest produced and consumed crop after rice and wheat in India. Maize is grown throughout the year in almost all States of the country. The maturity period of maize in different climatic zones is usually 90 to 150 days.

Varieties grown in winter take longer time compared to varieties grown in summer and spring. Thus, option (d) is the correct answer.

33. Which of the following is a C4 plants?

- (a) Rice (b) Soybean
(c) Maize (d) Wheat

U.P. P.C.S. (Mains) 2014

Ans. (c)

In the given option, maize is an example of a C4 plant. Rice wheat, barley, rye, soybean, cotton, tobacco and potato are examples of C3 plants.

34. Arrange the following states of India in descending order of their maize production and select the correct answer from the code given below –

1. Andhra Pradesh
2. Bihar
3. Karnataka
4. Rajasthan

Code :

- (a) 3, 2, 4, 1 (b) 1, 2, 3, 4

(c) 4, 3, 1, 2

(d) 1, 3, 4, 2

U.P.P.C.S. (Mains) 2010

Ans. (d)

The correct sequence of States in descending order of their maize production, when this question was asked, was – Andhra Pradesh > Karnataka > Rajasthan > Bihar. As per 2023-24 data, three leading maize producers are – Karnataka, Bihar and Madhya Pradesh.

35. Shaktiman-I and Shaktiman-II are the genetically modified crops of :

- (a) Cotton (b) Rice
(c) Maize (d) Wheat

U.P.P.C.S. (Mains) 2006

Ans. (c)

Shaktiman – I and Shaktiman – II are the genetically modified crops of Maize.

36. Commercial production of Saffron takes place in which of the following states?

- (a) Jammu and Kashmir (d) Himachal Pradesh
(c) Punjab (d) Kerala

U.P.P.C.S. (Pre) 1990

Ans. (a)

Commercial production of saffron takes place in the State of Jammu and Kashmir (The then state is now UT). It is also known as Zaffran.

37. The largest quantity of saffron is produced in

- (a) North East Hills (b) Kashmir
(c) Kerala (d) Goa

U.P.P.C.S. (Pre) 2007

Ans. (b)

The largest amount of saffron in India is produced in the Kashmir valley. Apart from India other countries producing saffron in the world are Spain, Iran, Greece and Italy.

38. Match List-I with List-II and select the correct answer.

List- I (Crops)

- A. Barley B. Rice**
C. Millets D. Tea

List- II (Geographical conditions)

- 1. Hot and dry climate with poor soil**
2. Cool climate with poorer soil
3. Warm and moist climate with high altitude
4. Hot and moist climate with rich soil

Code :

	A	B	C	D
(a)	2	4	1	3
(b)	3	4	1	2
(c)	2	1	4	3
(d)	3	2	4	1

I.A.S. (Pre) 1997

Ans. (a)

Crops asked in the question and their respective geographical conditions are given below –

Barley – Cool climate with poorer soil
Rice – Hot and moist climate with rich soil
Millets – Hot and dry climate with poor soil
Tea – Warm and moist climate with high altitude.

39. Match List I with List II and select the correct answer using the codes given below the lists.

List-I

- A. Cotton B. Flax**
C. Sugarbeet D. Jute

List-II

- 1. Rainfall 1000-1500 mm ; Temperature 40°-60°C**
2. Rainfall 1500-2000 mm ; Temperature 25°-35°C
3. Rainfall 600-800 mm ; Temperature 5°-18°C
4. Rainfall 500-1000 mm ; Temperature 18°-22°C
5. Rainfall 500-600 mm ; Temperature 18°-22°C

Code :

	A	B	C	D
(a)	1	3	4	2
(b)	2	3	5	4
(c)	4	5	2	1
(d)	4	3	5	2

I.A.S. (Pre) 1999

Ans. (d)

The correct match of List-I with List-II is as follows –
Cotton - Rainfall 500-1000 mm ; Temperature 18°-22°C
Flax - Rainfall 600-800 mm ; Temperature 5°-18°C
Sugarbeet – Rainfall 500-600 mm ; Temperature 18°-22°C
Jute – Rainfall 1500-2000 mm ; Temperature 25°-35°C

40. Which one of the following is cultivated by transplanting seedlings ?

- (a) Maize (b) Sorghum
(c) Onion (d) Soyabean

I.A.S. (Pre) 1997

Ans. (c)

Cultivation of onion is done by first sowing seeds on the ground. After sowing these seeds, small plants are grown which later are transplanted.

41. Which of the following crop cycle is considered best for eastern U.P?

- (a) Paddy – Maize. Wheat
- (b) Maize – Potato – Moong
- (c) Maize – Toria – wheat
- (d) Cotton – wheat – Moong

U.P.P.C.S. (Pre) 2008

Ans. (a)

Paddy, Maize and Wheat are considered as best crop cycle for eastern- Uttar Pradesh.

42. Who is credited with initiating the cultivation of Rajma and potato in Bhagirathi valley –

- (a) Wilson
- (b) Rama Brahamachari
- (c) Henry
- (d) Maharaja Sudarshan Shah

Uttarakhand P.C.S. (Pre) 2010

Ans. (a)

The credit of starting the cultivation of Rajma and Potato in Bhagirathi valley goes to Fredrick Wilson. He was the first white man to settle permanently in Bhagirathi valley in the 19th century. He had been titled as 'Pahari' and the "Raja of Harsil".

43. Match List I with List II and select the correct answer using the codes given below the lists:

List-I (Board)	List-II (Headquarters)
A. Coffee Board	1. Bengaluru
B. Rubber Board	2. Guntur
C. Tea Board	3. Kottayam
D. Tobacco Board	4. Kolkata

Code:

	A	B	C	D
(a)	2	4	3	1
(b)	1	3	4	2
(c)	2	3	4	1
(d)	1	4	3	2

I.A.S. (Pre) 2008

Ans. (b)

Correct match of Board and its Headquarters is as follows–
Coffee Board – Bengaluru
Rubber Board – Kottayam
Tea Board – Kolkata
Tobacco Board – Guntur

44. India's rank in vegetable production is –

- (a) First
- (b) Second
- (c) Fourth
- (d) Fifth

U.P.P.C.S. (Pre) 2006

Ans. (b)

India ranks second in the world after China, in vegetable fresh n.e.c. production (FAO : 2023).

45. Which of the following countries produces maximum vegetables in the world?

- (a) China
- (b) U.S.A.
- (c) India
- (d) Brazil

U.P. Lower Sub. (Pre) 2015

Ans. (a)

See the explanation of above question.

46. Seedless variety of mango is –

- (a) Ratna
- (b) Bombay Green
- (c) Krishan Bhog
- (d) Sindhu

U.P.P.C.S. (Pre) 2007

Ans. (d)

Indian scientists have developed a seedless mango variety named "Sindhu". This is the 'only' seedless variety of mango in the world.

47. Which one of the following varieties has been developed as a result of a cross between Dasherri and of mango Neelam?

- (a) Alphonso
- (b) Amrapali
- (c) Chausa
- (d) Mallika

U.P.P.C.S. (Mains) 2016

U.P.P.C.S. (Mains) 2013

Ans. (b)

Amrapali was developed as a hybrid variety of Dasherri and Neelam in 1971 by Indian Agriculture Research Institute, Pusa, Delhi.

48. Lalit is the developed variety of which of the following fruits ?

- (a) Mango
- (b) Guava
- (c) Banana
- (d) Strawberry

U.P.P.C.S. (Spl) (Pre) 2008

Ans. (b)

Lalit is the improvised variety of Guava developed by Indian Institute of Horticulture Research for north plains Lucknow. It has been recommended for commercial production.

49. Which among the following variety of mango is a regular crop variety?

- (a) Chausa
- (b) Langra

(c) Dasher-1

(d) None of the above

U.P.P.C.S. (Mains) 2014

Ans. (d)

Varieties given in the options i.e., Dasher-1, Chausa and Langra are not regular crop varieties. Dasher-51 is a variety of Mango which is a regular crop, while other varieties of Mango which are regular crops are as follows – Bengalora (Totapuri), Neelam, Amrapali, etc.

50. 'Kanchan' is an improved variety of

- (a) Grape
- (b) Indian gooseberry
- (c) Guava
- (d) Mango

U.P. Lower Sub. (Pre) 2015

Ans. (b)

Kanchan, Krishna and Banarasi are improved varieties of Indian gooseberry (Amla). Vitamin C is abundantly found in Amla.

51. "Ganga Varanasi" is a variety of –

- (a) Guava
- (b) Aonla
- (c) Mango
- (d) Muskmelon

U.P.P.C.S. (Mains) 2015

Ans. (*)

'Kashi Ganga' is a variety of bottle gourd. 'Kashi Madhu' is a variety of muskmelon. 'Banarasi' is a variety of gooseberry. It is also a variety of guava grown in Tamil Nadu and Andhra Pradesh. There is no known variety of any of the crops given in the option as 'Ganga Varanasi'.

52. Which one of the following is not correctly matched?

- | Crop | - | Variety |
|-----------|---|--------------|
| (a) Paddy | - | Govind |
| (b) Wheat | - | Shusk Samrat |
| (c) Arhar | - | Paras |
| (d) Pea | - | Prakash |

U.P.R.O./A.R.O. (Pre) 2016

Ans. (b)

The correct matched crops with their varieties are as follows:

- | (Crop) | - | (Variety) |
|--------|---|--------------|
| Paddy | - | Govind |
| Rice | - | Shusk Samrat |
| Arhar | - | Paras |
| Pea | - | Prakash |

Thus, option (b) is not correctly matched as Shusk Samrat is a variety of rice, not wheat.

53. The maximum production of Banana is obtained from the state of

- (a) Tamil Nadu
- (b) Maharashtra
- (c) Uttar Pradesh
- (d) Bihar

U.P.P.C.S. (Mains) 2013

Ans. (a)

When the question was asked option (a) was correct. Presently three leading producer (Banana) as per 2023-24 are as follows
Maharashtra > Andhra Pradesh > Tamil Nadu.

54. Gujarat is among the leading producers of which of the following crop?

- (a) Wheat
- (b) Sugarcane
- (c) Bajra
- (d) Coconut

U.P. P.C.S. (Mains) 2008

Ans. (c)

When the question was asked option (c) was correct answer. Production of Bajra (2022-23) of top four is as follows–
Rajasthan > Uttar Pradesh > Gujarat > Haryana.

55. Match List-I and List-II and select the correct answer from the codes given below the lists :

- | List-I (Crop) | List-II (State) |
|---------------|-------------------|
| A. Groundnut | 1. Andhra Pradesh |
| B. Mustard | 2. Rajashtan |
| C. Soyabean | 3. Madhya Pradesh |
| D. Coconut | 4. Kerala |

Code :

- | | A | B | C | D |
|-----|---|---|---|---|
| (a) | 1 | 3 | 2 | 4 |
| (b) | 2 | 1 | 3 | 4 |
| (c) | 1 | 2 | 3 | 4 |
| (d) | 4 | 3 | 2 | 1 |

U.P.P.C.S. (Mains) 2008

Ans. (c)

Correct match of the given crops and their main producing states is given as follows –

- | List – I (Crop) | List – II (States) |
|-----------------|------------------------------------|
| Groundnut | - Andhra Pradesh (Gujarat 2023-24) |
| Mustard | - Rajasthan (2023-24) |
| Soyabean | - Madhya Pradesh (2023-24) |
| Coconut | - Kerala (Karnataka 2023-24) |

56. Match List-I with List-II and select the correct answer from the codes given below:

List- I	List- II
A. Jute	1. Assam
B. Tea	2. Kerala
C. Rubber	3. West Bengal
D. Sugarcane	4. Uttar Pradesh

Code :

	A	B	C	D
(a)	3	1	2	4
(b)	4	3	1	2
(c)	2	4	3	1
(d)	1	2	3	4

U.P.R.O./A.R.O (Mains) 2014

U.P.U.D.A./L.D.A. (Pre) 2010

Ans. (a)

The correct match is as follows :

List- I		List- II
Jute	—	West Bengal
Tea	—	Assam
Rubber	—	Kerala
Sugarcane	—	Uttar Pradesh

57. In which of the following science fields Borlaug Award is given ?

- (a) Medicine (b) Space Research
(c) Atomic Physics (d) Agricultural Science

Uttarakhand P.C.S. (Mains) 2002

Ans. (d)

Borlaug Award is given in the field of Agricultural Science. It was started in 1972 on the name of Nobel Prize winner Norman E. Borlaug.

58. The best Potato variety for processing purposes is

- (a) Kufri Ashoka (b) Kufri Badshah
(c) Kufri Chipsona-2 (d) Kufri Sutlej

U.P.P.C.S. (Mains) 2008

Ans. (c)

Among the given varieties of Potato, the best variety of Potato for processing purposes is Kufri Chipsona-2. Kufri Chipsona-3 developed in 2005, and Kufri Himsona are the best varieties for plains and hilly areas respectively.

59. One of the aims of the National Food Security Mission is to bring sustainable growth, in cultivated land, and productivity of some crops in selected districts. Which are these crops ?

- (a) Only Rice and wheat
(b) Only Rice, wheat and pulses

(c) Only Rice, wheat, pulses and oilseeds

(d) Rice, wheat, pulses and vegetables.

I.A.S. (Pre) 2010

Ans. (b)

The main objective of the National Food Security Mission is to increase production of rice, wheat and pulses through area expansion and productivity enhancement in a sustainable manner in identified districts of the country restoring soil fertility and productivity at the individual farm level; creation of employment opportunities and enhancing farm level economy (i.e., farm profits) to restore confidence among farmers.

60. Which of the following crops are grown mostly under subsistence farming ?

- (a) Coarse Cereals and Rice
(b) Cotton and Tobacco
(c) Tea and Coffee
(d) Vegetables and Fruits

U.P.P.C.S. (Mains) 2007

Ans. (a)

Coarse cereals and rice are mostly produced under subsistence farming.

61. The stem of ginger which grows in the soil and stores food is called-

- (a) Bulb (b) Rhizome
(c) Rhizophora (d) Corm

R.A.S./R.T.S. (Pre) 1996

Ans. (b)

The stem of ginger which grows in the soil and stores food is known as Rhizome.

62. Which of the following is a cereal grain product :

- (a) Oatmeal (b) Sago
(c) Soya flour (d) Arrowroot

U.P.P.C.S. (Pre) 2002

Ans. (a)

Cereal grain product, oatmeal is used as food by people and also as fodder for cattle.

63. 'Mandua' (Koda) grain in Uttarakhand is exported mostly to which country?

- (a) United States of America (b) Great Britain
(c) Singapore (d) Japan

Uttarakhand P.C.S. (Mains) 2006

Ans. (d)

In the question period Mandua (Koda) grain in Uttarakhand is exported mostly to Japan. Food products made of Mandua are in high demand in foreign countries.

64. Consider the following crops of India

1. Groundnut
2. Sesame
3. Pearl millet

Which of the above is/are predominantly rainfed crop/crops?

- (a) 1 and 2 only (b) 2 and 3 only
(c) Only 3 (d) 1, 2 and 3

I.A.S. (Pre) 2012

Ans. (d)

Groundnut, Bajra (millet) and sesame are cultivated in dry areas. Irrigation of these crops is totally dependent on rain.

65. Consider the following crops of India

1. Cowpea
2. Green gram
3. Pigeon Pea

Which of the above is/are used as pulse, fodder and green manure?

- (a) 1 and 2 only (b) Only 2
(c) 1 and 3 only (d) 1, 2 and 3

I.A.S. (Pre) 2012

Ans. (d)

Cowpea, Green Gram and Pigeon Pea are used as fertilizer, fodder and pulses. By using green fertilizer of Arhar in one hectare land, 40 kg of nitrogen is obtained the Union Public Service Commission has taken (a) as the correct answer.

66. Among the following states, which one has the most suitable climatic conditions for the cultivation of a large variety of orchids with a minimum cost of production and can develop an export-oriented industry in this field?

- (a) Andhra Pradesh (b) Arunachal Pradesh
(c) Madhya Pradesh (d) Uttar Pradesh

I.A.S. (Pre) 2011

Ans. (b)

Arunachal Pradesh is emerging as a major tourist destination in North- East India. Here we find splendid biodiversity of plant and animal kingdom. This place is famous for its flourishing forests, variety of forest animals, deep-river valleys and beautiful plateaus. Arunachal Pradesh is home to varieties of orchids. Due to climatic suitability, Arunachal Pradesh can be developed for the cultivation of large varieties of orchids and establish export-oriented industry.

67. Which one of the following States was declared in January 2016 to be the first organic State of India?

- (a) Arunachal Pradesh (b) Kerala
(c) Odisha (d) Sikkim

U.P.P.C.S. (Mains) 2016

Ans. (d)

Sikkim is declared as the first Organic State of India by Hon'ble Prime Minister of India, Shri Narendra Modi in January, 2016. He appreciated Sikkim for its transformation into an eco Friendly farming state.

68. Which one of the following states of India has been declared the first bio or fully organic state of the country?

- (a) Uttarakhand (b) Bihar
(c) Sikkim (d) Chhattisgarh

U.P. Lower Sub. (Mains) 2016

Ans. (c)

See the explanation of above question.

69. A state in India has the following characteristics

1. Its northern part is arid and semi-arid.
2. Its central part produces cotton.
3. Cultivation of cash crops is predominant over food crops.

Which one of the following states has all of the above characteristics?

- (a) Andhra Pradesh (b) Gujarat
(c) Karnataka (d) Tamil Nadu

I.A.S. (Pre) 2011

Ans. (b)

The northern part of Gujarat is arid and semi-arid and in its central part, cultivation of cotton crops is done on large scale. Cultivation of cash crops is predominant over food crops in Gujarat.

70. In India, cluster bean (Guar) is traditionally used as a vegetable or animal food, but recently it's cultivation has assumed significance. Which one of the following statements is correct in this context?

- (a) The oil extracted from seeds is used in the manufacture of biodegradable plastics
(b) The gum made from its seeds is used in the extraction of shale gas
(c) The leaf extract of this plant has the properties of antihistamines
(d) It is a source of high-quality biodiesel

I.A.S. (Pre) 2014

Ans. (b)

The Guar or Cluster bean is an annual legume and the source of guar gum. Guar as a plant has a multitude of different functions for human and animal nutrition but its gelling agent containing seeds (guar gum) is today the most useful. Demand is rising rapidly due to the industrial use of guar gum in hydraulic fracturing (oil shale gas). About 80% of world production occurs in India and Pakistan.

71. Consider the following statements:

Assertion (A) : West Bengal is the leading producer of fish in India.

Reason (R) : West Bengal has well-developed fishing industry along the sea coast.

Select the correct answer from the code given below :

- (a) Both (A) and (R) are true, and (R) is the correct explanation of (A)
- (b) Both (A) and (R) are true, but (R) is not the correct explanation of (A)
- (c) (A) is true, but (R) is false
- (d) (A) is false, but (R) is true

U.P.P.C.S. (Mains) 2007

Ans. (c)

When this question was asked West Bengal was the largest producer of fish in India. It produced the largest amount of freshwater fish in the country. 90% fish production here is obtained from inland water sources. Here, the development of fish industry has not taken place near the seashore as much as it is developed inland. So, (A) is true, but (R) is false. According to the data of Handbook on Fisheries Statistics, 2023 for the year 2022-23 the leading inland and marine fish producing states are 1. Andhra Pradesh, 2. West Bengal, 3. Karnataka, 4. Odisha and 5. Kerala.

72. Identify the correct sequence of the following states in terms of fish production in descending order:

- (a) Gujarat, Kerala, Andhra Pradesh, Tamil Nadu
- (b) Kerala, Gujarat, Andhra Pradesh, Tamil Nadu
- (c) Andhra Pradesh, Gujarat, Kerala, Tamil Nadu
- (d) Tamil Nadu, Andhra Pradesh, Gujarat, Kerala.

U.P.P.C.S. (Pre) (Re-Exam) 2015

Ans. (c)

When the question was asked option (c) was the correct answer. As per 2022-23 data by the Department of Animal Husbandry, Dairying and Fisheries, leading fish producing states in India are –

- (1) Andhra Pradesh (51.06 Lakh tonnes)
- (2) West Bengal (20.45 Lakh tonnes)
- (3) Karnataka (12.25 Lakh tonnes)
- (4) Odisha (10.52 Lakh tonnes)
- (5) Kerala (9.21 Lakh tonnes)

73. Which one of the following statements is not correct ?

- (a) The fibre length of cotton is 1-5 cm.
- (b) Boron is a micronutrient.
- (c) Recommended dose of fertilizer (kg/ha) for Pusa Basmati Rice is N(120), P(60), K(60).
- (d) Edible part of apple is mesocarp.

U.P. Lower Sub. (Pre) 2013

Ans. (a)

The excellence of cotton is based upon its fibre length. Length of best cotton fibre is more than 5 cm. This variety is found in south-eastern shore of United States of America and West Indies. The fibre length of medium variety of cotton varies in the range of 3.75 cm to 5cm. Its production is done in Nile River Valley, Central Asian Republics of Tajikistan, Kazakhstan, Turkmenistan and Uzbekistan and also in the United States of America. Length of small cotton fibre is less than 2.5 cm and its major producing countries are Brazil and India. Mesocarp is included in edible part of apple. Commission had held option (d) as the correct answer to this question.

74. Which one of the following statements is not correct ?

- (a) Storage quality of apple is reduced due to the deficiency of Calcium.
- (b) West Bengal is the largest vegetable producing state in India.
- (c) Linseed oilseed crop can be grown throughout the year.
- (d) Third generation pesticide was first proposed by C.M. Williams.

U.P. Lower Sub. (Pre) 2013

Ans. (c)

Wheat, Barley, Linseed, Rapeseed, Mustard and Gram, etc. are Rabi crops.

75. Which one of the following statements is not correct ?

- (a) Bihar State is the highest producer of lac in India.
- (b) Planning Commission has divided India into Agro Climatic Regions.
- (c) Kunchikal waterfall is located in the Karnataka State of India.
- (d) Andhra Pradesh is the largest producer of rice in India.

U.P. Lower Sub. (Pre) 2013

Ans. (*)

Option (a) and (d) both are incorrect. Option (a) of the question was correct in that situation when Jharkhand was part of Bihar. In 2013-14, in terms of Lac production, Jharkhand is the leading producer and Chhattisgarh, Madhya Pradesh and Maharashtra are at second, third and fourth position respectively. About 92 percent of India's lac production takes place only in these States. West Bengal is the largest producer of Rice in India. Therefore, U.P.P.S.C. will have to remove this question from evaluation. U.P.P.S.C. actually had opted option (d) as the correct answer.

76. Which one of the following statements is not correct ?

- (a) Dr. B.P. Pal was the first Director-General of I.C.A.R.
- (b) India's rank in rice production in the world is second.
- (c) Soyabean seed contains 20% oil and 40% Protein.
- (d) 'Aman' rice is sown in March - April.

U.P. Lower Sub. (Pre) 2013

Ans. (d)

Aman rice is sown during June-July and harvested in November – December. India is the second largest producer of rice after China, in the world. Soyabean seed contains 20% oil and 40% protein. Dr. B.P. Pal was the first director general of Indian Council of Agricultural Research.

77. Which one of the following statements is not correct ?

- (a) The pulse crop which does not fix nitrogen from the atmosphere is Rajma.
- (b) PBW-343 and DBW-17 are varieties of wheat.
- (c) Khaira disease of rice can be controlled by spraying zinc sulphate.
- (d) UP AS-120 is a variety of gram.

U.P. Lower Sub. (Pre) 2013

Ans. (*)

From sources and available facts, both option (a) and (d) are incorrect. Hence, a single option cannot be selected as the answer.

1. The statement given in option (a) says the pulse crop which does not fix nitrogen from atmosphere is Rajma. According to different research, Rajma has different nitrogen fixation. Scientific World Vol. 9. No. 9, July, 2011.

Red Kidney bean (*Phaseolus Vulgari*) a kind of annual leguminous crop, native to China is locally called Rajma in Nepal. It is cultivated as a crop or intercropped with other crops. It is also nitrogen-fixing crop with the symbiosis of *Rhizobium* i.e. *R. leguminosarum* bv. *Phaseoli* form nodulation and fix atmospheric nitrogen symbiotically.

● **Ali and Lal 1992**

Unlike other pulses, rajma is inefficient in symbiotic nitrogen fixation. Nodulation is poor in rajma.

In option (d) it has been given that UPAS-120 is a variety of Gram. UPAS-120 is a variety of Arhar, not Gram. The official website of the Ministry of Agriculture has shown UPAS-120 as a variety of Arhar. Hence, option (d) is also not correct. Commission has accepted (d) as the correct answer.

78. Which one of the following statements is not true ?

- (a) Kaushal is a variety of Rice.
- (b) First Agricultural University in India was established in the year 1960.
- (c) Kerala State is the highest producer of Coconut.
- (d) Largest production of pulses is obtained from the State of Rajasthan.

U.P. Lower Sub. (Pre) 2013

Ans. (*)

Options (a) and (d) both are wrong. Kaushal is actually a variety of groundnut not of rice and maximum production of pulses comes from Madhya Pradesh, not from Rajasthan. So, in this context, there are two options (a) and (d) which are not correct but Commission has accepted option (d) as the correct answer.

79. Consider the following pairs :

Region	Well-known for the production of
1. Kinnaur	: Arecanut
2. Mewat	: Mango
3. Coromandel	: Soyabean

Which of the above pairs is/are correctly matched?

- (a) 1 and 2 only (b) 3 only
(c) 1, 2 and 3 (d) None

I.A.S. (Pre) 2014

Ans. (d)

According to the report published by National Horticulture Board, major areas of arecanut production in India are Karnataka, Kerala, Assam, Meghalaya, West Bengal and Tripura. District Kinnaur is located in Himachal Pradesh, therefore, pair (1) is not matched correctly. In India major producers of Mango are Uttar Pradesh, Andhra Pradesh Bihar, Karnataka, Tamil Nadu, West Bengal, Odisha and Maharashtra. Mewat (Now-Nuh) district is located in Haryana, therefore it is clear that pair (2) is also not matched correctly Major producers of soyabean in India are Madhya Pradesh, Maharashtra, Rajasthan, Andhra Pradesh and Karnataka, but Coromandel is not known for soyabean production. Thus all the given pairs are not correctly matched.

80. India's contribution to the world's fruit production is—

- (a) 20% (b) 25%
(c) 10% (d) 15%

U.P.P.C.S. (Mains) 2013

Ans. (d)

According to the Indian Horticulture data 2014, India is the second largest producer of fruit with 13.6 percent share in the total fruit production in the world. China is the largest producer with 20.9 percent share. India accounted for 13.6 percent of the total fruit production in the world in 2014. Thus, the closest answer will be option (d). Presently India is at first place fruit producing (other fruits n.e.c.) country in the world (FAO : 2023).

81. India is the largest producer of which of the following fruits in the world as per the Annual Report of the Department of Agriculture Cooperation and Farmers Welfare, government of India, 2020-21?

1. Grapes
2. Mango
3. Orange
4. Papaya

Select the correct answer using the code given below:

Code :

- (a) 1 and 2 (b) 1 and 3
(c) 2 and 3 (d) 2 and 4

U.P. R.O./A.R.O. (Mains) 2021

Ans. (d)

According to the annual report 2020-21 of the then Agriculture, Cooperation and Farmers Welfare Department of the Government of India, India is the second largest producer of Fruits in the world and it is the largest producer of mango, banana, papaya and lemon. According to Horticultural statistics at a Glance 2021, India is the second largest producer (in 2020) of Fruits in the world and it is largest producer of Banana, Papaya, Mango and Lemon.

82. Which of the following is not a cash crop?

- (a) Jute (b) Groundnut
(c) Jowar (d) Sugarcane
(e) None of the above/More than one of the above.

60th to 62nd B.P.S.C. (Pre) 2016

Ans. (c)

Jowar is not a cash crop among the given option. Economic Survey, Government of India, displays the major crops of India as follows :

(A) Food crops (1) Rice, Wheat, Maize, Coarse, Cereals (2) Pulses

(B) Non-food crops (Cash crops) -

1. Oilseeds, Groundnut, Rapeseed and Mustard
2. Fiber cotton, Jute, Mesta,
3. Plantation crops - Tea, Coffee, Rubber, Potato.
4. Others - Sugarcane, Tobacco

83. Match List-I with List-II and select the correct answer from the codes given below:

List-I (Crop)	List-II (Season)
A. Sunflower	1. Kharif (rainy)
B. Muskmelon	2. Zaid (summer)
C. Cotton	3. Rabi (winter)
D. Linseed	4. All the season

Code :

A	B	C	D
(a) 3	4	1	2
(b) 4	2	1	2
(c) 3	4	2	1
(d) 2	3	4	1

U.P. R.O./A.R.O. (Pre) (Re-Exam) 2016

Ans. (b)

Correct match is as follows :

(Crop)	(Season)
Sunflower	All the season
Muskmelon	Zaid (summer)
Cotton	Kharif (rainy)
Linseed	Rabi (winter)

84. Which of the following practices can help in water conservation in agriculture?

1. Reduced or zero tillage of the land
2. Applying gypsum before irrigating the field
3. Allowing crop residue to remain in the field

Select the correct answer using the code given below:

- (a) 1 and 2 only (b) 3 only
(c) 1 and 3 only (d) 1, 2 and 3

I.A.S. (Pre) 2017

Ans. (d)

Zero tillage is a method of farming in which crops are grown repeatedly for several years without tilling the land. Due to this, moisture remains in the land. The use of gypsum before irrigation in the field and leaving the crop residue in the field also increases the soil moisture. As a result, all the three of these methods can help with water conservation in agriculture.

85. Match List-I with List-II and select the correct answer from the codes given below the list:

List-I (Crop/Plantation)	List-II (Largest producer state)
A. Jute	1. Kerala
B. Tea	2. Uttar Pradesh
C. Sugarcane	3. Assam
D. Rubber	4. West Bengal

Code :

A	B	C	D
(a) 4	3	2	1
(b) 3	1	2	4
(c) 2	4	3	1
(d) 1	2	3	4

U.P. R.O./A.R.O. (Pre) 2017

Ans. (a)

The correct match of Crop/Plantation and largest producer state :	
Crop / Plantation	(Largest producer state)
Jute	West Bengal
Tea	Assam
Sugarcane	Uttar Pradesh
Rubber	Kerala

86. Which of the following pairs is not correctly matched?

Crop	State
(a) Maize	- Uttar Pradesh
(b) Jute	- West Bengal
(c) Cotton	- Maharashtra
(d) Soyabean	- Andhra Pradesh

Chhattisgarh P.C.S. (Pre) 2019

Ans. (d)

The correct match of Crop and State is :

Crop	State
Maize	Uttar Pradesh
Jute	West Bengal
Soyabean	Madhya Pradesh

Among the given options Soybean production is minimum in Andhra Pradesh, while the rest of the options are matched with the states which produces more of the given crops. Presently-
Maize (2023-24) - Karnataka (First Producer)
Jute & Mesta (2023-24) - West Bengal (First Producer)
Soyabean (2023-24) - Madhya Pradesh (First Producer)
Cotton (2023-24) - Gujarat (First Producer)

87. The Sultana, Gulabi and Kali Champa varieties in different regions of India are varieties of which of the following major fruits?

- (a) Custard Apple (b) Orange
(c) Guava (d) Grapes

U.P. P.C.S. (Pre) 2018

Ans. (d)

Sultana, Gulabi and Kali Champa are varieties of grapes.

88. Which one of the following is NOT correctly matched?

Crop	Weed
(a) Wheat	Phalaris minor
(b) Paddy	Bathua
(c) Pea	Piyazi
(d) Berseem	Kasni

U.P. R.O./A.R.O. (Pre) (Re-Exam) 2016

Ans. (b)

The botanical name of Bathua is the *Chenopodium album*. It often grows as a weed among crops like wheat, pea, mustard. Its green leaves are used as vegetables only. It does not grow with paddy crop. Other options are correctly matched.

89. Which of the following is NOT correctly matched?

(Crop)	(Variety)
(a) Mustard	Varuna
(b) Pea	Rachna
(c) Linseed	Neelam
(d) Paddy	Radhey

U.P. R.O./A.R.O. (Mains) 2016

Ans. (d)

Radhey is the variety of chickpea. It is recommended to farmers of Bundelkhand region of Uttar Pradesh.

90. Maize – Potato – Sugarcane (ratoon) – Moong is the example of crop rotation for :

- (a) 2 years (b) 3 years
(c) 4 years (d) 1 year

Jharkhand P.C.S. (Pre) 2021

Ans. (b)

Maize, potato, sugarcane (ratoon), Moong crop cycle is an example of 3 year crop rotation.

91. "NABI MG" is -

- (a) A variety of Maize (b) A variety of Barley
(c) A variety of Millet (d) A variety of Wheat

R.A.S / R.T.S. (Pre) 2021

Ans. (d)

NABI MG is a variety of wheat. It's colored wheat. Color wheat developed by NABI is available in 3 different colors (Black, Blue and Purple) known as NABI variety.

92. First herbicide produced in the world is :

- (a) 2, 4, 5-T (b) Pendimethalin
(c) Semazin (d) 2, 4-D

Jharkhand .P.C.S. (Pre) 2021

Ans. (d)

2, 4-D of the above options were the first herbicide produced in the world.

93. Which of the following is not correctly matched?

- (a) Maize – Tasseling
(b) Pliny – Pegging
(c) Ptolemy – Tillering
(d) Strabo – Topping

U.P.R.O./A.R.O. (Mains) 2021

Ans. (c)

Tasseling, Pegging, Tillering and Topping are cultivating techniques of crops. Topping technique of chickpea is removal of the tips of the young branches of gram plant when it is 2 to 4 weeks old.

94. What percentage does Uttar Pradesh contribute to the Mentha oil production of India?

- (a) 60% (b) 85%
(c) 75% (d) 90%

U.P. R.O./A.R.O. (Mains) 2017

Ans. (b)

When the question was asked option (b) was correct answer. In India, Uttar Pradesh is the largest producer of Mentha oil contributing up to 100% of total production.

95. Which one of the following is not correctly matched?

Crop	Disease
(a) Paddy	Wilt
(b) Mustard	White rust
(c) Bajra	Smut
(d) Groundnut	Tikka

U.P. P.C.S. (Mains) 2017

Ans. (a)

All are correctly matched except option (a). The disease wilt is not a specific disease of paddy. A wilt disease can affect the vascular system of plants as well.

96. Which among the following statements is not true?

- (a) Rust is a disease found in wheat.
(b) Early blight is a disease found in Potato.
(c) False smut is a disease found in barley.
(d) Khaira is a disease found in paddy.

U.P. R.O./A.R.O. (Pre) 2018

Ans. (c)

False smut is a disease found in Rice.

97. Which of the following is not a correct pair of crop and its leading producing State?

- (a) Rice: West Bengal
(b) Wheat: Uttar Pradesh
(c) Cotton: Gujarat
(d) Rape and Mustard: Rajasthan

Chhattisgarh P.C.S. (Pre) 2017

Ans. (c)

When the question was asked option (c) was correct answer. According to data of 2023-24. The largest producer of cotton is Gujarat. Maharashtra is the second largest producer.

98. In which of the following state is Black Pepper and Cardamom produced?

- (a) Assam (b) Jammu and Kashmir
(c) Himachal Pradesh (d) Kerala

U.P. R.O./A.R.O. (Mains) 2017

Ans. (d)

According to option Kerala state is Black Pepper and Cardamom produced.

99. The dryland farming in India is largely confined to the regions having annual rainfall of :

- (a) less than 25 cm (b) less than 50 cm

- (c) less than 75 cm (d) less than 100 cm

Jharkhand P.C.S. (Pre) 2023

Ans. (c)

Dryland farming, also known as dry farming or rainfed agriculture, refers to agricultural practices carried out in regions characterized by limited water availability, particularly areas with low and erratic rainfall. Significantly, dryland farming in India is practiced in regions with annual rainfall below 750 millimeters.

100. With reference to organic farming in India, consider the following statements.

1. 'The National Programme for Organic Production' (NPOP) is operated under the guidelines and directions of the Union Ministry of Rural Development.
 2. 'The Agricultural and Processed Food Products Export Development Authority' (APEDA) functions as the Secretariat for the implementation of NPOP.
 3. Sikkim has become India's first fully organic State.
- Which of the statements given above is/are correct?**

- (a) 1 and 2 (b) 2 and 3
(c) 3 only (d) 1, 2 and 3

I.A.S (Pre) 2018

Ans. (b)

The Agriculture and Processed Food Products Export Development Authority (APEDA) is the implementing agency for the NPOP. The APEDA was established by the Government of India under the Agricultural and Processed Food Products Export Development Authority Act passed by the Parliament. Hence statement 2 is correct. Sikkim became India's first fully organic state. Hence statement 3 is correct.

101. Which of the following is not a cash crop?

- (a) Jute (b) Millet
(c) Sugarcane (d) Peanut

Jharkhand P.C.S. (Pre) 2023

Ans. (b)

A Cash crop, also called crop is an agricultural crop that is grown to sell for profit. In regions with a tropical climate, coffee, cocoa, sugarcane, bananas, orange, cotton and jute are common cash crop.

102. Which of the following statements are true?

- I. Bajra is sown in hot and dry climatic conditions of western and central parts of India.
- II. It is a hardy crop which can resist frequent dry spells.
- III. Being a rainfed crop, the yield of this crop is low in Rajasthan.
- IV. Rajasthan leads in its production.

Choose the correct answer from the options given below:

- (a) I and II (b) II and III
(c) III and IV (d) I and IV

Jharkhand P.C.S. (Pre) 2023

Ans. (*)

Bajra is sown in hot and dry climatic conditions of western and central parts of India. Significantly, Bajra is a hardy crop known for its ability to resist frequent dry spells. Notably the yield of Bajra can be relatively low in Rajasthan. Significantly, Rajasthan leads in its production.

103. Agricultural drought is defined is :

- (a) uneven distribution of rainfall over time and place
(b) low soil moisture
(c) inadequate rainfall of 30 percent or more in cropped areas
(d) the lack of water supply in water storage reservoirs which can be compensated by normal rainfall

Jharkhand P.C.S. (Pre) 2023

Ans. (b)

Agricultural drought referring to lack of moisture in the soil where crops grow. So the second statement [option (b)] is the correct answer.

Significantly, Hydrological drought refers to the low levels of water in reservoirs. Notably Meteorological drought is defined usually on the basis of the degree of dryness and the duration of the dry period.

104. Mahi Kanchan and RCB 911 are hybrid varieties of:

- (a) Maize and Barley respectively
(b) Maize and Rice respectively
(c) Maize and Bajra respectively
(d) Bajra and Maize respectively
(e) Question not attempted

Raj. P.C.S. (Pre) 2023

Ans. (c)
