

20. What is the most famous feature of Chiria located in West Singhbhum?

- (a) Iron Ore Mining
- (b) Dam
- (c) Bird Sanctuary
- (d) National Park
- (e) None of the above / More than one of the above

67th B.P.S.C. (Pre) 2022

Ans. (a)

Chiria, located in West Singhbhum, is famous for Iron Ore Mining.

21. Which of the following statements regarding iron ore in India is not correct?

- (a) Our country has mainly haematite and magnetite reserves of iron ore.
- (b) About 80% of the total reserves of iron ore of the country are located in Jharkhand and Odisha.
- (c) Bellary is a major mining area of iron ore in Karnataka.
- (d) Mayurbhanj district has a significant place in Odisha in terms of iron ore.

M.P.P.C.S. (Pre) 2022

Ans. (b)

According to Indian Minerals Yearbook 2022, major reserves/resources of haematite are located in Odisha (39%), Jharkhand (20%), Chhattisgarh (19%), Karnataka (12%) and Goa (5%). Thus the total reserves/resources of haematite in Odisha and Jharkhand are only 59%. India's 96.70% magnetite reserves/resources are located in five states, namely, Karnataka (69.50%), followed by Andhra Pradesh (13.10%), Rajasthan (7.10%), Tamil Nadu (4.70%) and Goa (2.30%). Thus option (b) is wrong and the other options are correct.

ii. Zinc

*Zinc is generally found in the combined form with lead from the sulphides of Zinc. It is used to prevent rusting in iron, making an alloy, Electrodes, Motor parts, dry batteries, etc.

*The State of Rajasthan has a **monopoly in the production and reserves of Zinc**.

*Best quality Zinc and Lead reserves of Asia are found in **Rampur Agucha region** of Bhilwara District. ***Zawar region** (Udaipur District) in Rajasthan is the largest zinc producing area in India. Other deposits of zinc in Rajasthan are - **Rajpur Debari region** (Udaipur), **Dungarpur, Alwar,**

Banswada, and Sirohi.

*Minor deposits of zinc in India are found in Bhotang region (Sikkim), Riyasi (Jammu and Kashmir), Almora and Tehri-Garhwal (Uttarakhand).

***Hindustan Zinc Limited** has established super smelter system that works for the melting of zinc and lead with the help of Britain in Rampur Agucha region.

1. Asia's best zinc and lead reserves are available in –

- (a) Rajpur Dariba of Rajsamand District
- (b) Delwara of Udaipur District
- (c) Rampur Agucha of Bhilwara District
- (d) Jhamar Kodra of Udaipur District

R.A.S./R.T.S. (Pre) 2007

Ans. (c)

Rajasthan is the leading zinc and lead producing state of India. According to 2021-22 (P) data, Rajasthan has a near monopoly in zinc and lead production. Asia's best zinc and lead reserves are located in Rampur Agucha region of Bhilwara District. Hindustan Zinc Limited has established a super smelter machine with the help of Britain which is used to melt zinc and lead. Other reserves of zinc and lead in Rajasthan are- Zawar region (Udaipur), Rajpur Debari region (Udaipur), Dungarpur, Alwar, Banswara and Sirohi.

2. Rajasthan has near monopoly in –

- (a) Copper
- (b) Mica
- (c) Zinc
- (d) Dolomite

U.P.P.C.S. (Mains) 2013

Ans. (c)

According to Indian Minerals Yearbook 2022, Rajasthan is endowed with the largest reserves/resources of lead- zinc ore (89.32%).

iii. Silver

*Silver is generally found combined with Lead, Zinc and Copper from acidic igneous rocks. As per the figures of 2021-22 (P), **Rajasthan is the largest producer of Silver**.

*Second leading state is Karnataka. According to Indian Minerals yearbook 2022, the total reserves/resources of silver in the country as of April 1, 2020 (P) in terms of metal content was estimated at 30267 tonnes, of which 7707 tonnes are under 'Reserves' and 22560 tonnes are under the 'Remaining Resources'.
