

3. Which of the following industries uses bauxite as a principal raw material?

- (a) Aluminium (b) Cement
(c) Fertilizer (d) Ferro-manganese

Chhattisgarh P.C.S. (Pre) 2018

Ans. (a)

Bauxite, containing 15-25 percent aluminium is the only ore that is used for commercial extraction of aluminium today. According to data from Indian Minerals Yearbook, 2022 in India, Odisha is the largest bauxite producer. Its main deposits are found in Kalahandi, Koraput, Sundargarh, Bolangir and Sambalpur districts.

4. Two leading producers of bauxite in India are –

- (a) Jharkhand and Gujarat
(b) Gujarat and Odisha
(c) Odisha and Maharashtra
(d) Odisha and Jharkhand

U.P.U.D.A./L.D.A. (Spl.) (Pre) 2010

Ans. (*)

When the question was asked option (b) was the correct answer. According to Indian Minerals Yearbook 2022, the leading producers of bauxite during 2021-22 (P) were – Odisha, Gujarat, Jharkhand, Chhattisgarh and Maharashtra.

5. Match List-I with List-II and select the correct answer from the codes given below :

- | | |
|--------------------------------|--------------------------------------|
| List-I
(Mining Area) | List - II
(Mineral Wealth) |
| A. Kalahandi | 1. Gold |
| B. Zawar | 2. Copper |
| C. Kolar | 3. Bauxite |
| D. Mosabani | 4. Zinc and Lead |

Codes -

- | | | | | |
|-----|---|---|---|---|
| | A | B | C | D |
| (a) | 1 | 2 | 3 | 4 |
| (b) | 1 | 4 | 3 | 2 |
| (c) | 3 | 4 | 1 | 2 |
| (d) | 3 | 2 | 4 | 1 |

M.P.P.C.S. (Pre) 2019

Ans. (c)

The correct match is :

Mining area	Mineral wealth
Kalahandi	Bauxite
Zawar	Zinc and Lead
Kolar	Gold
Mosabani	Copper

6. In which district of Chhattisgarh bauxite mineral is available?

- (a) Raipur (b) Durg
(c) Kondagaon (d) Dhamtari

Chhattisgarh P.C.S. (Pre) 2019

Ans. (c)

According to Indian Minerals Yearbook 2022, bauxite mineral is mainly available in Kabirdham, Kondagaon and Surguja districts of Chhattisgarh.

7. Out of these, which state has the largest deposits of bauxite ?

- (a) Andhra Pradesh (b) Odisha
(c) Jharkhand (d) Gujarat

M.P.P.C.S. (Pre) 2024

Ans. (b)

According to the data of Indian Minerals Yearbook, 2022 [as of 1.4.2020(P)], Odisha (41%) had the highest total bauxite resource (Total Reserves/Resources) among the states in the country, followed by Chhattisgarh (20%), Andhra Pradesh (12%), Gujarat (8%) and Jharkhand (6%).

vi. Tin

*Tin is one of the earliest metals known and used mainly in bronze implements. It is a scarce element with an incidence of about 2 PPM in the earth's crust. Tin is used mostly for tin plating, soldering special alloys and in the production of bronze. Tin ore is known as **Cassiterite**. Tin reserves are limited in India. **Chhattisgarh** is the **only state producing tin** in India. According to data from Indian Minerals Yearbook 2022, major reserves/resources (as of 1/04/2020) of tin ore are found in Haryana, Chhattisgarh and Odisha. *The production of tin concentrates in 2021-22 (P) was at 26292 kg., as against 16865 kg. in the preceding year. All companies (1 public sector and 5 private sectors) related to tin mines reported production in 2021-22 (P). All these mines are located in Chhattisgarh.

1. Which of the following states has immense tin ore reserves?

- (a) Assam (b) Jammu and Kashmir
(c) Chhattisgarh (d) West Bengal

U.P.P.C.S. (Pre) (Re-Exam) 2015

Ans. (c)
