

18. Anushakti Vidyut Nigam Limited is a joint venture of the Nuclear Power Corporation of India and

- (a) NMDC
- (b) NHPC
- (c) BHEL
- (d) NTPC

U.P.P.C.S. (Pre) (Re-Exam) 2015

Ans. (d)

Anushakti Vidyut Nigam Limited is a joint venture of Nuclear Power Corporation of India Limited (NPCIL), which holds 51% equity share and National Thermal Power Corporation Ltd. (NTPC), which holds 49% of the remaining share. It was incorporated on 27 January 2011.

19. Which of the following pairs related to States of India and proposed nuclear power plants is not correctly matched?

- (a) Jaitpur - Maharashtra
- (b) Mithi Viridi - Gujarat
- (c) Haripur - Haryana
- (d) Kovvadda - Andhra Pradesh

U.P.P.S.C. (GIC) 2017

Ans. (c)

The correct matching of Nuclear power plants and concerned states is as follows :
Jaitpur - Maharashtra
Mithi Viridi - Gujarat
Haripur - West Bengal
Kovvadda - Andhra Pradesh

20. Which of the following combinations of Nuclear Power Plant and state is wrong?

- (a) Kaiga – Uttar Pradesh
- (b) Kalapakkam – Karnataka
- (c) Kakrapar – Gujarat
- (d) Kudankulam – Tamil Nadu

Jharkhand P.C.S. (Pre) 2021

Ans. (a & b)

The correct match is as follows :
Kaiga – Karnataka
Kalapakkam – Tamil Nadu
Kakrapar – Gujarat
Kudankulam – Tamil Nadu

21. Which of the following atomic power plants has the largest installed capacity?

- (a) Kakrapar
- (b) Kaiga
- (c) Narora
- (d) Tarapur

Jharkhand .P.C.S. (Pre) 2021

Ans. (d)

The installed capacity of Tarapur Nuclear Power Plant is the highest according to the installed capacity of the current nuclear power plants from the given options :

Kakrapar – 1840 MW

Kaiga – 880 MW

Narora – 440 MW

Tarapur – 1400 MW

iii. Hydroelectricity

*Hydroelectricity in India is one of the major sources of energy. Hydroelectricity is generated by fast flowing water, which is a renewable resource. It is easiest to develop hydroelectricity in mountainous areas. The first small hydro project of 130 KW. commissioned in the hills of Darjeeling in 1897 marked the development of hydropower in India. The Shivasamudram project of 4500 KW was the next to come up in the Mysore district of Karnataka in 1902, for the supply of power to the Kodar gold mines. Now India has a number of multi-purpose projects like the Bhakra Nangal, Damodar Valley Corporation and the Kopili Hydel project etc producing hydroelectric power. National Hydroelectric Power Corporation (NHPC) Limited is the largest hydropower development organization in India, with capabilities to undertake all the activities from conceptualization to commissioning of hydro projects. NHPC has also diversified in the field of solar and wind energy development etc.

NHPC Ltd. was incorporated in 1975 under the Companies Act, 1956. The company is mandated to plan, promote and organize an integrated and efficient development of power

in all its aspects through conventional and non-conventional sources in India and abroad. NHPC is a listed company on the NSE and BSE, successfully concluding its IPO in 2009.

NHPC Power Station Under Operation (Incl. JV)				
Name of Project	River	State/UT	Total Capacity (MW)	Year of Commissioning
Baira Siul	Baira, Siul, Bhaledh (Tributaries of Ravi River)	Himachal Pradesh	180	1981
Loktak	Leimatak (Loktak Lake)	Manipur	105	1983
Salal	Chenab	UT of Jammu & Kashmir	690	1987
